

# office memorandum

Date: February 22, 2017  
To: Brenda Hall, City Clerk  
From: Charlie Thomas, P.E., Capital Projects Engineer *CT*  
Subject: Request to vacate Public Right-of-Way  
Southridge Addition; Oklahoma Avenue at Classen Boulevard

Subject lot includes an existing sanitary sewer located in an existing easement, essentially centered on the lot and traversing it north to south. The Norman Utilities Authority (NUA) desires to relocate said sewer in Oklahoma Avenue ROW, crossing Enid Avenue, thence southwest (SW) to existing manhole in east ROW of Classen Boulevard

NUA staff has reviewed the subject request to vacate Public Right-of-Way. NUA staff does not object to the requested closing, subject to the following:

- Provide, at the sole expense of the applicant, an easement from the south ROW of Enid street to existing sanitary sewer manhole in east ROW of Classen Boulevard.

NUA staff can concur with approval of the request, if the above condition is met, or filed of record on the closing document. Please advise if you have any questions.
