

EXHIBIT K

HARDWARE SERVER COMPLIANCE

New World has reviewed the attached hardware and storage specifications and assisted the **City** in validating these configurations with its 3rd party equipment vendors. **New World** validates that the Chickasaw Telecom quote #12-09131048 meets/exceeds **New World's** physical host requirements for the virtual infrastructure and that ISG Technology quote #OK-MF-058299 ver. 2 meets/exceeds **New World's** physical storage requirements for the virtual infrastructure. Furthermore, it is understood that the attached server and storage specifications do not include the required Microsoft system software licenses specified in the attached virtual machine specifications and that the **City** will secure those licenses separately under their Microsoft Enterprise/Select agreement. The **City** LAN/WAN environment must also meet the **New World** provided network and bandwidth specifications as illustrated in the attached system diagram.
