

# OKLAHOMA 2011-2012 STATE RAILROAD MAP

ON THE COVER TIME magazine recognized the Heartland Flyer bio-diesel test as one of "The 50 Best Inventions of 2010." The Heartland Flyer was selected for a year-long test route utilizing a bio-diesel blend known as B20 (20% pure biodiesel and 80% diesel). The test will measure exhaust emissions and engine wear using a renewable fuel source. This test became a reality when Amtrak received a \$274,000 Federal Railroad Administration grant to carry out the research project. The Oklahoma Department of Transportation was the lead agency with support from the Texas Department of Transportation. Amtrak's locomotive #600, a General Electric P42DC, 3,200 horsepower, 12 cylinder engine was selected as the test vehicle. With the actual test ending in the spring of 2011, results of the test should be known later in the year.

The Heartland Flyer traveling along the Washita River between Pauls Valley and Ardmore in the Big Canyon area of the Arbuckle Mountains. The Heartland Flyer carried a record 81,743 passengers in 2010 and is on course to break the record in 2011. The Heartland Flyer is also Amtrak's #1 rated train in customer satisfaction. It makes a daily round trip from Oklahoma City and Fort Worth, Texas with stops at Norman, Purcell, Pauls Valley, Ardmore and Okemah.
