body

BACKGROUND: On November 22, 2011, the Norman City Council approved Programming Resolution R-1112-63 requesting federal funds for the West Lindsey Street Improvements. This resolution states the City's commitment to adhere to the terms and conditions of a federally funded project. Through the Association of Central Oklahoma Governments (ACOG,) the Oklahoma Department of Transportation (ODOT) agrees to provide 80% of the cost, up to \$9.7 million, and administer the construction with the matching share from the City of Norman. In order to receive the federal funding, the City of Norman is required to enter into an agreement with ODOT to complete the design, acquire all necessary rights-of-way and relocate utilities and encroachments at 100% the City's cost.

On August 28, 2012, the citizens of Norman voted in favor of a Bond Election to finance the local share of eight transportation/storm water improvement projects. One of the eight project is the West Lindsey Street Improvement Project.

The roadway portion of the project includes transportation and aesthetic improvements to West Lindsey Street. The West Lindsey Street corridor between Interstate 35 and Berry Road is the most congested corridor in the Oklahoma City metropolitan area. This section of West Lindsey Street has a traffic accident rate three (3) times the national average for similar urban arterial streets.

Proposed improvements for the roadway project include:

- Widening West Lindsey Street from 3 lanes to 4 lanes with additional lanes at intersections
- New bridge over Imhoff Creek
- Continuous sidewalks on both sides of the street
- Access management to adjacent properties
- Multi-modal improvements including on-street bicycle lanes
- Aesthetic enhancements including decorative pavement, landscaping and roadway lighting
- Underground utilities
- Accessibility improvements for disabled individuals
- Storm water improvements

The storm water portion of the project addresses the flooding problems along West Lindsey Street, most notably at the Lindsey Street and McGee Drive intersection. Storm water from a 3.4 square mile watershed will be conveyed to an underground pipeline which will discharge directly to the Canadian River.

On January 13, 2015 Council approved Contract K-1415-86, a Right of Way, Utility and Encroachment agreement with the Oklahoma Department of Transportation. This agreement stipulates that the City will acquire all right-of-way required for the project, grant ODOT access to and the use of the right-of-way for this project, relocate all utilities and encroachments from the construction area and to indemnify and hold ODOT harmless.

DISCUSSION: The City must acquire 60 easements along Lindsey Street between 24th Avenue SW and Pickard Avenue for the construction of the West Lindsey Street Improvement Project. These easements are limited in size and generally used for the purpose of utility systems. As promised, no permanent right-of-way is being acquired. Currently, staff has secured twenty nine (29) easements. Negotiations are currently under way for the remaining thirty-one (31) easements from sixteen (16) property owners. Staff requested donations prior to making any offers of fair market value. The attached table provides the details of each easement. Also a map is attached providing the location of each easement necessary for the project. Funds are available in Lindsey Widening: 24th-Berry, Right of Way (account 050-9552-431.60-01, project BP0189).

RECOMMENDATION: Staff recommends the above described easements be accepted, and that payment be authorized, where appropriate, and the filing thereof be directed.
