* A request was made by a potential bidder to allow for a substitute fixture package; therefore, an Addendum was issued on October 16th that stipulated the bidder must also bid the specified fixture package and the City reserved the right to evaluate the substitute package after the bids were received for compliance with the specifications. After receipt of the bids, the substitute fixture package was reviewed by the City's architect/engineer for the project who recommended the contract be awarded with the fixtures outlined in the bid specifications due to overall quality and life expectancy of the specified fixtures.

Staff recommends the bids be accepted and the bid meeting all specifications be awarded to Terrell Electric, Inc., in the amount of \$485,500. Funds are available in Project No. EF1004, Building Lighting, Construction (050-9540-419.61-01).
