\$1,524.00 48 Month Extended Warranty Police (POLICE ESP) Per Unit

\$31,704.88 Motorcycle Total Per Unit

\$63,409.76 Grand Total for Two Units

The installation of the emergency equipment **shall** be done in a manner that it appears to be factory Harley-Davidson (no butt splices, no crimp connector, no split loom shrouding). All connections will either use factory Harley-Davidson Deutsch Connectors or soldered connections with heat-shrink wrap. Harley-Davidson factory connectors shall be used in the areas that regularly need removed for service/replacement of parts (e.g. front PAR36 emergency light housing with LINV Whelen lightheads or Whelen windshield array) **The installation shall include a workmanship/install warranty for the term of at least 2 years** and all work **shall be completed by a currently certified Harley-Davidson Level 5 Electrical Technician. Installation of Whelen lightheads requires the sync function wire is connected in series front and rear to all lightheads so the flash pattern is synchronized and set to a department approved pattern.**

NOTE: The RFQ called for a Harley Davidson Diagnostic Scan Tool & Accessory Kit or equivalent product. The Harley-Davidson Digital Technician "Scan Tool" is not readily available for departmental purchase. These are a restricted item from H-D and your local H-D dealership would have to sponsor the City of Norman and agreed to allow/provide a DigiTech unit.

Payable to **Maverick Harley-Davidson 1845 N I-35 East Carrollton Texas 75006**

Net 30 Days from Point of Delivery on **Invoice # 120418-1**
