Text of Legislative File BID-1920-48

Body

BACKGROUND. Water maintenance crews use repair clamps to repair ruptured water mains. These clamps come in many lengths and diameters and are used according to the specific type and extent of the break. Division specifications require all-stainless steel repair clamps due to the soil conditions in Norman. Each manufacturer uses stainless steel technology and all repair clamps are compatible among suppliers.

Copper meter yokes are used in connecting the water meter and residential service lines to the City water main. The HDPE meter boxes with cast iron lids are used to cover the water meter when installing a new meter service. A purchase of approximately 300-400 copper meter yokes and HDPE meter boxes is foreseen for the fiscal year ending June 30, 2020 (FY20).

DISCUSSION. Bid 1920-48 provides competitive prices for the purchase, on an "as needed" basis, for varied repair clamps, copper meter yokes for water meters, and meter boxes. Six vendors were invited to bid; five bidders responded. Bids were opened on February 27, 2020. The attached bid tabulation provides a complete accounting of these bids.

Bid prices for copper meter yokes did not increase over current contract prices. Bid prices for stainless steel repair clamps on average increased by 4% over current contract bids approved in 2017. Bid prices for HDPE meter boxes increased in cost by 9% from current contract amounts in 2017.

RECOMMENDATION. It is recommended that Bid 1920-48 be awarded to the lowest and best bidders as follows:
