Subject: RE: Adoption/Rescue Trailer

Trey;
Thank you for your email! In answer to your questions:
1. We quoted the walls as stainless steel (that was part of your specs)
2. Since you are getting 2 AC/Heat units & the hot water heater we automatically increased the generator to 7000 watt (5500 isn't sufficient and we aren't going to sell you something that will give you problems). So to answer your question, we didn't specify the 7000 watt generator in the quote but it is included silently.

Subject: Adoption/Rescue Trailer

Mr. Brown,

I have a couple of questions about the bid I received from you. The first question is, did you make the quote for stainless steel walls inside the trailer rather than aluminum? If the trailer has a hot water tank will the 5500 watt generator run both the hot water tank along with the lights and other functions with the trailer or do we need a larger generator to run everything? Also could you send me some references from trailers you have sold in the past?
