

CAPITAL IMPROVEMENT PROJECTS BUDGET

THE CITY OF NORMAN, OKLAHOMA

FISCAL YEAR ENDING JUNE 30, 2020

FINANCIAL PLAN—FISCAL YEAR-END 2021-2024

**a city of
festivals**

ON THE COVER: Norman is known throughout Oklahoma and the mid-southwestern United States as *“a city of festivals”*. Each year, millions of people visit Norman and its wide diversity of events and festivals, including the Norman Music Festival and Lion’s Club Carnival held in April; the Medieval Fair; Earth Day; MayFair; Midsummer Night’s Fair; Jazz in June; Fall Festival; Mix on Main Street; GrooveFest; Downtown Porch Festival; 2nd Friday Art Walk in the Walker Arts District; Oklahoma Sooner Football and other University-sponsored events; Norman Day (4th of July Festival); National Weather Center Biennale; “Beats and Bites” Festival; Aviation Festival; and many smaller events held in City parks, neighborhoods and local businesses. Norman has many large and small entertainment and sporting venues, and more are planned or under construction. Information and event calendars can be obtained from www.visitnorman.com.

THE CITY OF NORMAN

OUR MISSION

“WORKING TOGETHER TO DELIVER EXCEPTIONAL SERVICE”

To fulfill our mission, City of Norman employees pledge themselves to these values:

TEAMWORK

We value each other's contribution and encourage teamwork.

CARING

We value service to others in a caring manner. We listen with a willingness to understand the needs of others. We respond in a friendly, helpful way.

ACCOUNTABILITY

We are responsible for our work and actions.

SERVICE

We are committed to providing exceptional service in a courteous, dependable and efficient manner.

RESPECT

We respect our differences and treat each other with understanding and dignity.

FAIRNESS

We seek to understand the needs of others. We strive for equity in the delivery of services and in the treatment of individuals.

PROFESSIONALISM

We value a knowledgeable, capable and effective organization.

RESPONSIVENESS

We value a timely response to both customer and employee.

We believe that these values are the foundation of all our endeavors to make our community a better place now and for future generations.

CITY OF NORMAN

GOVERNMENT FINANCE OFFICERS ASSOCIATION

*Distinguished
Budget Presentation
Award*

PRESENTED TO

City of Norman

Oklahoma

For the Fiscal Year Beginning

July 1, 2018

Christopher P. Morrell

Executive Director

The Government Finance Officers Association of the United States and Canada (GFOA) presented a Distinguished Budget Presentation Award to the City of Norman, Oklahoma, for its annual budget for the fiscal year beginning July 1, 2018.

In order to receive this award, a governmental unit must publish a budget document that meets the program criteria as a policy document, as an operations guide, as a financial plan, and as a communications device.

The award is valid for a period of one year only. We believe our current budget continues to conform to program requirements, and we are submitting it to GFOA to determine its eligibility for another award.

Executive Summary of the FYE 2020 Capital Improvement Projects Budget - By Fund

I. Dedicated Public Safety Sales Tax Fund (15)

Revenues to this fund derive from the Public Safety Sales Tax. The City will sell general obligation bonds and repay them with PSST as collected. Only approved projects may be funded. Beginning in FYE20, capital outlay, project projects and debt service will be included in Fund 50.

II. Community Development Block Grant Fund (21)

Revenues to this fund derive from Federal Government grants. The City will advance the funds and the grant program will reimburse the City based on regularly filed claims. During FYE20 no capital projects are yet identified.

III. Special Grants Fund (22)

Revenues to this fund derive from contributions, gifts of cash, or other assets from another government or non-profit agency to and used for a specific purpose. They are budgeted as received. There no proposed new funding in FYE20.

IV. Room Tax Fund (23)

The Room Tax Fund monitors revenues and expenditures of the Guest Room Tax. There is 1 project valued at \$90,000 budgeted in FYE20.

V. Water Fund (31)

Capital projects are funded through user fees, bonds, loans and grants. Funding for capital projects in FYE20 totals \$10,192,130. Project expenses from the Water Fund include Water Distribution System (\$7,835,130), Water Towers (\$450,000), Water Well Improvements (\$0), Water Treatment Plant (\$1,565,000), Urban Service Area Water Line Repairs (\$242,000), and Hot Soils Water Line Repair Program (\$100,000). Significant impact on the operating budget is expected. Most of the impact cannot be quantified at this time. However, it is estimated that annual payments for water rights will impact the operating budget, as wells are constructed, by approximately \$11,000 per well per year. These wells will produce approximately 300,000 gallons each, which will generate potential revenue of \$124,000/well/year at \$1.14/1,000 gallons.

VI. Water Reclamation Fund (32)

Funding for these projects are wastewater user fees, revenue bonds, and project specific grants. Capital project expense for 6 projects in FYE20 is \$4,179,000.

VII. Sewer Maintenance Fund (321)

Funding sources derive from user fees, which include a \$5 per month sewer-maintenance rate, effective October 1 2001. A "Worst Case First" approach was implemented in FYE 2003, with the first projects addressing sewer lines in the oldest parts of Norman. Two capital projects are funded in FYE20 in the amount of \$2,800,000 in pay-as-you-go capital projects for repairing and replacing aging and deteriorating sewer lines, lift stations, emergency repairs, and supporting facilities. Replacement of deteriorated sewer lines should decrease infiltration and inflow into the collection system, reducing treatment costs and line maintenance costs.

VIII. New Development Excise Tax Fund (322)

A new development excise tax was approved by referendum and became effective October 1, 2001. Revenues are used for constructing improvements to wastewater collection, conveyance and treatment facilities. These are for new growth (full build-out) related wastewater capital projects, including interceptor improvements and north side wastewater treatment plant environmental impact studies, as required by the Environmental Protection Agency (EPA) as part of the permitting process. In FYE20, one new project valued at \$939,700 is scheduled.

IX. Sanitation Fund (33)

Funding sources derive from user fees. There are two new projects valued at \$210,000 in FYE20.

X. Capital Fund (50)

Anticipated revenue derives from the “capital sales tax” dedicated to capital improvements (7/10 of the second penny) - projected to be \$12.74 million new in FYE20. Bond projects will use \$15,149,145 of GOB. Also, \$150,000 is anticipated to be available from earned interest. PSST funds in the amount of \$803,689 will be used for outlay and projects. UNP TIF funds will be received to pay debt service.

Capital Outlay

By Council policy, 27% of the capital sales tax revenue is dedicated for capital outlay. In FYE20, the amount of \$3,296,414 will be transferred to the General Fund (10) and \$18,000 will be transferred to the Westwood Fund (29) for capital outlay. PSST will fund \$53,689.

Street Maintenance

Street maintenance continues to be a high priority. Revenue dedicated for street improvements by formula is 25% of the capital sales tax. In FYE20, \$2,307,877 is budgeted for alley repair, asphalt and concrete pavement maintenance, asphalt paver patch, concrete valley gutter, crack seal, force account drainage materials, and rural road improvements. In FYE20 an additional \$70,000 is transferred to the General Fund for Storm Water Drainage Labor. A significant amount of street maintenance, not included here, is funded in the GOB projects listed below.

Maintenance of Existing Facilities

Maintenance of existing facilities is to preserve existing facilities and prevent/postpone need for major capital expenditures. Revenue dedicated for facility maintenance by formula is 5% of the capital sales tax. In FYE20, \$185,000 is included for 8 individual projects.

Other Capital Projects

Other capital project expenses include \$8,513,312 for projects, \$1,235,582 for salaries & benefits and \$16,699 for Services & Maintenance. Major project categories include Transportation (\$2,751,500), Buildings and Grounds (\$2,941,000, of which \$750,000 is funded with PSST), Parks and Recreation (\$38,000) and Stormwater (\$765,000).

GOB Projects - 2008

One project is funded at \$9,488,743 – the Municipal Complex Renovation and Expansion.

GOB Projects – 2012

On August 18, 2012, voters approved \$42,575,000 in major street and bridge projects. Property tax is the authorized funding source. Some of these expenses have been approved in amendments to the Budget. There is \$2,000,000 scheduled in FYE20 to continue one project. The remaining expenses are scheduled in FYE 21 to complete the program.

GOB Projects – 2016

On April 5, 2016, voters approved \$25,360,000 in street maintenance projects. General obligation bonds will be sold with a temporary sales tax as the funding source. There is \$4,803,302 scheduled in FYE20. The remaining expenses are scheduled in FYE21 through FYE22 to complete the program.

GOB Projects – 2019

On April 2, 2019, voters approved \$72,000,000 in transportation improvement projects. General obligation bonds will be sold with a temporary sales tax as the funding source. There is \$8,305,803 expenses programmed for FYE20, with the remaining program scheduled from FYE21 to beyond 5 years.

Capital projects will affect the General Fund operating budget. Facility/infrastructure improvements and replacements are built to higher standards, and should reduce maintenance expenses, increase efficiency and increase safety (i.e. the Maintenance of Existing Facilities set-aside, Building Maintenance Projects, etc.). However, there will be a gradual but cumulative demand to maintain more traffic control facilities, buildings and parks in future years.

XI. Norman Forward Sales Tax Fund (51)

NORMAN FORWARD is a quality of life initiative proposed by community groups and residents. On October 13, 2015 voters authorized a ½ cent temporary (15 years) sales tax to fund the projects. Collection began January 1, 2016. Some of the projects will be funded on a pay as you go basis. Some of the projects are of higher importance and greater costs, and therefore require borrowing funds through general obligation bonds. In FYE20, \$21,892,860 of bond funded projects are scheduled, and \$6,100,000 of paygo funded projects are scheduled. The individual projects' impacts on the operating budget may be significant because they are new and expanded facilities.

XII. Park Land and Development Fund (52)

Revenues derive from land development and vary according to the growth rate. Typically, projects appear before Council for budgeting when sufficient development occurs to warrant improvements and sufficient funds collected to pay for the improvements. In FYE20, there are no new projects.

XIII. University North Park Tax Increment Finance District Fund (57)

The purpose of the University North Park TIF (TIF #2) is to facilitate development and improvements in the University North Park Area, in accordance with the Oklahoma Constitution and Local Development Act. City Council and property owners identified projects to fund. The continuation of one capital project is shown in FYE20 for \$1,100,000. Any additional new projects will be presented to Council for approval as they are identified.

XIV. Arterial Road Recoupment Fund (78)

The Arterial Road Recoupment Fund's purpose is to act as a revolving fund to match private funds in constructing arterial roads, in an effort to prevent dangerous gaps. As land is developed, developers are required to construct or fund the widening of the adjacent arterial roads that serve their subdivision. Because it is rare that all adjacent land develops at the same time, the resulting scenario is unimproved road segments, or gaps. In effect, the directional lanes would be two lanes, then one lane, then two lanes, such that dangerous driving conditions occur. The intent is that development pay its way when it (recoupment district) develops. Initial funding of this program was from the Capital Fund. Future revenues will reimburse this fund as a revolving source for this program. In FYE20, no new project budgets are scheduled.

Overview

OVERVIEW OF THE CAPITAL IMPROVEMENTS PLAN

1. PLANNING

The Capital Improvements Plan (CIP) is the schedule established by the City of Norman that identifies the major improvement projects and schedules them to fit its fiscal capabilities for five years into the future. Annual reviews are made of the capital improvement projects budget and plan, and the plan is extended one year, to maintain a six-year schema.

Capital Projects generally cost more than \$10,000, are relatively fixed or permanent in nature and have an expected life of more than five years. Such projects consist of the construction of a new, expanded or improved tangible asset, which is physically fixed. Major projects normally require more than one fiscal year to complete. Contracted services for design, land acquisition, utility relocations and construction may be required. Examples include land purchase, new buildings, building additions, street improvements, utility line improvements, parks and playgrounds, and major drainage channel improvements.

Capital Outlay, on the other hand, is an expenditure directed towards maintaining or purchasing new or replacing tangible assets which themselves have expected life spans of one to five years. Expenses are generally one-time and occur within a single budget year. Examples include the purchase of vehicles and equipment.

The CIP maintains a multi-year time frame. Information is updated annually in conjunction with the budget process. Prior years' actual project expenditures are included. The first year shown is the budget for the active fiscal year. The second year is the next fiscal year, for which an official annual budget is being prepared. The remaining four years are projections of anticipated revenues and expenses based on estimated needs and priorities.

Capital projects originate at virtually any point in time and from a variety of sources. Any citizen, organization, Board or Commission may submit requests to Council at any time. Also, special studies and master plans for various city services (such as wastewater, water, parks and recreation, or transportation) culminate at various times, usually resulting in recommended capital projects, including operating impact, scheduling, and revenue sources. If Council determines sufficient need and/or funds exist, then the Capital Budget and/or Plan may be amended. Otherwise, the annual planning and budgeting process begins in the Fall of each year.

2. BUDGETING

The Capital Improvements Budget follows the Oklahoma Municipal Budget Act. The budget is organized according to Enterprise Funds, which are described throughout this document. This is a multi-year program, identifying total project expenses related to a particular project. Past actual expenses are included, however, the first single year is the active fiscal year. After the end of this fiscal year, both the encumbered and unencumbered budgeted amounts automatically roll into the following fiscal year's budget to maintain funding continuity, until the projects are individually closed. The second single year is the additional new funding for the upcoming fiscal year's budget. The remaining years constitute a plan.

The Municipal Budget Act authorizes optional (effective July 1, 2006) nonfiscal budgeting for capital expenses. "*Encumbrances for funds whose sole purpose is to account for grants and capital projects and/or any unexpended appropriation balances may be considered nonfiscal and excluded from the budget by the governing body, but shall be reappropriated to the same funds, accounts and for the same purposes for the successive fiscal year, unless the grant, project or purpose is designated or declared closed or completed by the governing body.*" (11 O.S., Section 17-206, D.). In other words, once appropriated, a budget (encumbered and unencumbered balances) could automatically carry over from one fiscal year to the next until that project is either completed, its budget spent, or the project declared closed. It would no longer be necessary for Council to reconcile and reappropriate unencumbered fund balances for capital project accounts, but only to declare when a grant, project or purpose is closed or completed. This policy was adopted by Council beginning with the FYE 2010 budget.

During the Fall, Council and Staff begin reviewing the status of capital project implementation and the need to incorporate adjustments or amendments to policy, priorities, scope or costs. Typically Council holds this initial review in November. A first draft proposal for a new CIP is prepared for Council's consideration and comment in February. In response, revisions are prepared and a fiscally responsible multi-year plan is prepared. Additional Council study sessions are held during March, April and May for recommendations and adjustments. A public hearing is then held at a regularly scheduled Council meeting. When adopted in June, the first year becomes the fiscal year budget and the remaining years constitute the projected Capital Improvements Plan.

3. IMPLEMENTATION

With City approval and/or funding available, project managers pursue the necessary steps to implement the approved projects. Each quarter, written reports are submitted to Council and the public about the status and progress of projects.

Typically there are four implementation stages. Design of the improvement is accomplished by a qualified professional and requires proper selection procedures (this may be staff or consultant). Right-of-way acquisition must provide fair treatment of the owner's rights and use of public funds, and sometimes involves hiring of consultant services. Utility relocations involve both City and non-city owned "public" and private facilities and requires coordination of work space and scheduling. Finally, facility construction requires fair selection of contractors, traffic management, inspections, and approvals throughout the period of construction.

When projects anticipate outside funding (such as grants, transportation matching funds, private donations) there are additional requirements of the City. Outside revenues usually are limited to certain types of expenses, with the City responsible for the remainder. Schedules and costs are affected by such things as the availability of grants, results of plan reviews, differing construction standards, and specific property acquisition procedures.

4. 2025 LAND USE AND TRANSPORTATION PLAN POLICY

General Policies were determined through an extensive citizen participation process and Council action; and documented in the long range general plan for the City. The overall GOAL is to implement City Council public service policies as defined in the 2025 PLAN adopted by Council. It also serves as the basis for infrastructure master plans (i.e., water, wastewater, drainage, parks, et. al).

- a. In summary, the 2025 PLAN establishes the following goals related to capital improvements:
 - Goal 1 – Affirmatively and responsibly manage the location of growth in Norman based on available public services and environmental suitability of the land for development.
 - Goal 2 – Utilize the provision of infrastructure in supporting and influencing growth into areas most suitable for development.
 - Goal 3 - Encourage and support diversified housing types and densities in order to serve different income levels, family structures and ownership.
 - Goal 4 – Enhance the quality of economic growth in the City by attracting high technology-related industries that have low environmental impacts.
 - Goal 5 – Retain the distinct character of rural Norman and protect the environmentally sensitive Little River Drainage Basin.
 - Goal 6 – Develop and maintain a greenbelt system for Norman.
 - Goal 7 - Continue efforts to promote the enhancement and stability of the core area.
- b. Land use patterns (industrial parks/corridors, commercial nodes, neighborhood units, tourist commercial nodes, suburban large lot development, etc.) designated in the 2025 PLAN, as well as environmental and natural resource protection, topography, geology and geography, shall determine design, capacities and location of facilities.
- c. Specific capital projects in the 2025 PLAN shall be considered for programming, subject to the most current review and priorities of City Council.
- d. Utility System Master Plans (i.e., Water, Wastewater, Drainage, Parks, Greenways, et al) shall be utilized to designate the provision of all major City of Norman utility systems in advance of demand, based on projected population, innovative practices, and the Development Sector concept (drainage sub-basins).
- e. All available funding sources shall be used to provide basic public utility services, including utility districts, grants and loans, general obligation bonds, revenue bonds, private participation, intergovernmental agreements, tax increment financing districts, et al.

5. GENERAL PROGRAMMING ASSUMPTIONS

The following assumptions also affect the Capital Improvements Plan:

- a. The City will have enough of the right kind of personnel to accomplish approved projects or effectively manage contractors.
- b. Priorities will change periodically based on programming factors such as available funding, emergency situations, shifts in City policies or strategies, regional or national economics, unforeseen opportunities, incorrect assumptions, project scope, federal or state regulations.
- c. The purpose of projects significantly affects the timing of construction. Factors influencing timing of a project include any of the following:
 - community activity external to capital program management - land development requiring city services, peak hour demand on the water system;
 - federal or state regulations - EPA and ODEQ wastewater treatment effluent standards;
 - emergencies - special events, storms, drought, infrastructure failure; and

- physical dependence of one project on another - sewage collection lines dependent on interceptors, and sewer/water lines under streets that are both scheduled for improvement.
- d. Projects that started in a phased manner are high priority for continued funding. The first priority in this category are those being funded by general obligation or revenue bonds, because the funds must be spent within a specified time period after sale and there is an obligation to the voters and higher governments to finish these as soon as practical.
- e. The Capital Projects Plan shall act as a guide and shall be annually reviewed, updated, and incorporated into Capital Budgets.
- f. Once Council approves budgets, the funds will remain as commitments unless Council acts otherwise or the projects are closed.
- g. Cost under-runs will be determined, as individual projects are closed. Project managers make written requests to:
 - Declare when a project has been completed, and
 - Release unused funds for other uses by closing them.
- h. Project budget transfers shall follow the City's Account Transfer Manual.
- i. The CIP will primarily be a "pay-as-you-go" (PAYGO) effort incorporating debt financing and private funds as appropriate.
- j. Enterprise Funds shall finance related capital projects. If revenues are insufficient, it may be necessary to request voters to increase user fees and/or authorize revenue bonds.
- k. The Capital Fund (funded by 70% of the second cent sales tax) will pay for capital project needs which are not associated with enterprise revenues or which require supplemental funding.
- l. Each year, the Capital Budget will attempt to include funds for capital needs of all related services.
- m. The completion of arterial streets with existing paving gaps shall be a high priority, and scheduled within the Arterial Road Recoupment Fund when possible.
- n. A sound financial program to maintain and upgrade existing section line roads shall be included.
- o. The future impact on the operating budget is an important consideration when evaluating capital projects because it may be necessary to adjust those funds. Operating budget impact comments are included on each project sheet. In most instances, it is difficult to predict the dollar impact, so the following general categories are used: "positive" (will either generate some revenue to offset expenses or will reduce operating costs), "negligible" (operating expenses will increase no more than about \$10,000 per year), "slight" (operating expenses will increase between about \$10,001 & \$50,000 per year), "moderate" (operating expenses will increase between about \$50,001 & \$100,000 per year), or "high" (operating expenses will increase more than about \$100,001 per year).

6. AMENDMENTS

In order for the five-year Capital Improvement Plan to remain a useful guide for public and private investment, it is necessary that it be flexible. City Council is the only body that can amend the CIP. Major reasons for amendments include the following:

- a. Change of Council policy,
- b. Annual budgeting process,
- c. Rescheduling approved projects,
- d. Adding new projects,
- e. Deleting projects,
- f. Changing the scope of approved projects,
- g. Changing financial assumptions or revenue projections, or
- h. Changing the 2025 LAND USE AND TRANSPORTATION PLAN.

All amendments shall be justified by incorporating:

- a. Detailed project description,
- b. Justification; and
- c. Funding.

7. FYE20 CAPITAL IMPROVEMENTS PROJECTS BUDGET

The FYE20 CIP includes revenues from several sources and expenditures for various purposes. The first chart illustrates sources of revenues expected in FYE20 for spending on capital improvement projects. The second chart illustrates expenses for capital projects.

This chart reflects anticipated revenues from all sources that are available in FYE20 for capital projects. Most revenue sources are earmarked for specific purposes and are not available for anything else. Only revenues needed to meet FYE20 needs are shown, but are not typically equal for any given fiscal year.

Bonds provide the greatest proportion of revenue for capital projects at 45%, followed by Capital Sales Tax at 26% and User Fees at 14%. Smaller amounts are derived from the other sources.

Sources of Revenue - All Capital Projects

User Fees	\$12,398,797	14.44%
Capital Improvement Charge	2,182,333	2.54%
Sewer Replacement Charge	0	0.00%
Sewer Maintenance Rate	2,800,000	3.26%
Sewer Excise Tax	939,700	1.09%
Capital Sales Tax	21,761,183	25.34%
Tax Increment Financing	1,100,000	1.28%
Public Safety Sales Tax	807,289	0.94%
Norman Forward Sales Tax	6,100,000	7.10%
Room Tax	90,000	0.10%
Bonds	37,041,965	43.13%
Private	660,510	0.77%
	\$85,881,777	100.00%

Due to the nature of capital projects, expenses may not occur in the year proposed, and balances may be carried forward, because most project expenses occur over several fiscal years. However, this chart represents new budget requests for FYE20 only. The greatest shares are scheduled for Buildings & Grounds at 31%, Transportation at 25%, and Parks & Recreation at 18%.

Expenditures by Purpose - All Funds

Capital Outlay	\$3,429,581	3.99%
Maint of Existing Facilities	238,000	0.28%
Personnel & Services	1,322,281	1.54%
Street Maintenance	2,307,877	2.69%
Transportation	20,362,605	23.71%
Buildings & Grounds	26,779,743	31.18%
Parks & Recreation	15,168,860	17.66%
Water Reclamation	5,315,700	6.19%
Sanitation	0	0.00%
Stormwater	765,000	0.89%
Water	10,192,130	11.87%
Total	\$85,881,777	100.00%

Capital Outlay for non-enterprise related services are funded from the Capital Penny sales tax in Fund 50. By policy, Council annually designates 27% of the projected new Capital Penny revenue. Enterprise related capital outlay expenses are funded with enterprise sources. Included is a reserve for the Senior Citizens Center of \$261,770 from Fund 50.

In FYE20, the largest portion of Capital Outlay Expenditures is for Fleet/Vehicles at 61% followed by Other equipment at 15%, Computer related equipment at 15% and Computer related equipment at 11%. Expenditures for capital outlay from the Capital Fund include the following:

Expenditures for Capital Outlay – Funds 50

Computer related equipment	\$	385,790	11.22%
Public Safety equipment	\$	298,511	8.68%
Fleet/Vehicles	\$	2,109,274	61.32%
Other equipment	\$	499,299	14.52%
Furniture/Appliances/Fixtures	\$	24,440	0.71%
Undesignated Outlay	\$	122,486	3.56%
	\$	3,439,800	100.00%

Notes:

*** Fleet/Vehicles includes police & fire fleet

** Computer includes police and fire pcs

In addition, Fund 50 includes a Public Safety Sales Tax expense of \$750,000 for fire apparatus replacement and Capital Fund 50 will transfer \$18,000 to Westwood for vehicles.

Cheers and Beers

**Public Safety
Sales Tax Fund**

DESIGNATED PUBLIC SAFETY SALES TAX FUND – 15

ASSUMPTIONS

1. This fund accounts for the proceeds of a specific revenue source that is legally restricted to expenditure for specific purposes.
2. Revenue is received in the form of special sales tax which repays a general obligation bond.
3. Projects are expected to be completed within a designated amount of time.
4. No additional capital outlay or projects are programmed from this fund, begin in FYE20. They will be accounted through Fund 50 in the future.

CDBG Fund

COMMUNITY DEVELOPMENT BLOCK GRANT FUND – 21

ASSUMPTIONS

1. This fund accounts for the proceeds of a specific revenue source that is legally restricted to expenditure for specific purposes.
2. Revenue is received in the form of special grant reimbursement for capital projects.
3. No new funding is proposed for FYE20. When the federal grand program information is available it will be presented to City Council for consideration.

Special Revenue Fund

SPECIAL REVENUE FUND - 22

ASSUMPTIONS

1. This fund accounts for the proceeds of specific revenue sources that are legally restricted to expenditure for specific purposes.
2. Revenues are received in the form of special grants for capital projects. Local match is typically budgeted in the fund that is its source.
3. Projects are typically completed within a short amount of time and future programming is rare.
4. Agencies approve grants at various times throughout the year.
5. No new project is proposed for the FYE20. Council will be presented with proposals as projects and funding becomes available in the future.

CITY OF NORMAN

PROJECT TITLE: Firehouse Art Center Addition PROJ. CATEGORY: Parks & Recreation DEPARTMENT: Parks and Recreation MANAGER: James Briggs WARD(s): 4	PROJECT TYPE: Parks & Recreation Improvt. PROJECT NUMBER: RT0027/PR0026 ACCOUNT NUMBER: 022-9638-451/023-9638-451 BEGIN & END DATES: 7/1/17 to 6/30/21 LIFE EXPECTANCY: 50 Years
--	--

DETAILED PROJECT DESCRIPTION:

For decades, the Firehouse Art Center has offered art classes and artist training for a wide variety of mediums--painting, sculpture, photography, music, drawing, performance art, ceramics, textiles, graphic arts and more. In the past decade, they have dramatically increased their youth programs in conjunction with the Norman Public Schools art education programs. Over the years, the building in Lions Park has served as the main campus for these programs. The building was built as a Fire Station in the 1940's--and was converted to an artist space in the 1970's, when a new fire station was built to replace the Lions Park station. Several improvements have been made to the space over the years; but with increased staffing and enrollment--the space is very under-sized. The Firehouse Board of Directors has proposed a project to raise funds for a building addition--and since the space is owned by the City of Norman, it would be a benefit to both parties if we could speed up the project by sharing the costs through the Room Tax Fund, as proposed here. The first year of funding would be used to hire a design firm to prepare construction documents for the project. A subsequent year would be used to fund the building project. Major improvements would include adding restrooms to the downstairs space, increasing the office space for staff, increasing gallery space for the artists and additional classroom space.

CAPITAL IMPROVEMENTS PLAN

ROOM TAX FUND - 23

ASSUMPTIONS

1. The referendum of July 15, 1980 authorized collection and delineated disbursement of a 4% Hotel/Motel Room Tax. Approximately 25% of the Room Tax Revenues (net of Administrative Fees) are specifically to be used for visible, image enhancing projects. April 2, 2013 Voters authorized increasing the Room Tax rate to 5%.
2. Continuation of one project is included is FYE20, totaling \$90,000.

CITY OF NORMAN

PROJECT TITLE: Firehouse Art Center Addition PROJ. CATEGORY: Parks & Recreation DEPARTMENT: Parks and Recreation MANAGER: James Briggs WARD(s): 4	PROJECT TYPE: Parks & Recreation Improvt. PROJECT NUMBER: RT0027/PR0026 ACCOUNT NUMBER: 022-9638-451/023-9638-451 BEGIN & END DATES: 7/1/17 to 6/30/19 LIFE EXPECTANCY: 50 Years
--	--

DETAILED PROJECT DESCRIPTION:

For decades, the Firehouse Art Center has offered art classes and artist training for a wide variety of mediums--painting, sculpture, photography, music, drawing, performance art, ceramics, textiles, graphic arts and more. In the past decade, they have dramatically increased their youth programs in conjunction with the Norman Public Schools art education programs. Over the years, the building in Lions Park has served as the main campus for these programs. The building was built as a Fire Station in the 1940's--and was converted to an artist space in the 1970's, when a new fire station was built to replace the Lions Park station. Several improvements have been made to the space over the years; but with increased staffing and enrollment--the space is very under-sized. The Firehouse Board of Directors has proposed a project to raise funds for a building addition--and since the space is owned by the City of Norman, it would be a benefit to both parties if we could speed up the project by sharing the costs through the Room Tax Fund, as proposed here. The first year of funding would be used to hire a design firm to prepare construction documents for the project. A subsequent year would be used to fund the building project. Major improvements would include adding restrooms to the downstairs space, increasing the office space for staff, increasing gallery space for the artists and additional classroom space.

CITY OF NORMAN

PROJECT TITLE:	Historical Museum Improvements	PROJECT TYPE:	Parks & Recreation	Improv.
PROJ. CATEGORY:	Parks & Recreation	PROJECT NUMBER:	RT0090	
DEPARTMENT:	Parks and Recreation	ACCOUNT NUMBER:	23-9627-452	
MANAGER:	James Briggs	BEGIN & END DATES:	7/1/19	to 6/30/21
WARD(s):	4	LIFE EXPECTANCY:	30 years	

DETAILED PROJECT DESCRIPTION:

This project is for the construction of a small parking lot on the land across the alley from the Moore-Lindsey House and Historical Museum at the corner of Acres and Peters. The lot is currently a grass area owned and maintained by the City, along with the museum; and used for overflow parking for the facility. However, the City does not allow parking on non-paved surfaces; so this project would make any parking in that area follow the standard applied to all properties. Design work was hired-out in FYE 2019; and design documents can be ready for bid during FYE2020.

Recently, Museum staff has noticed that the frames of several of the glass storm windows on the main house are starting to show signs of wood rot; especially on the cool and damp north side of the house. Similarly, the paint on the house is showing signs of wear in several places. The same situation is occurring on the Carriage House. Therefore, we would also like to fund a project to repair the windows and repaint at both structures. This would greatly improve the look and longevity of these historic buildings, which has seen a recent increase in visitation due to a more active programming schedule by the Cleveland County Historical Society (the organization which leases the house from the City and operates the museum on a daily basis with their employees and volunteers).

The second year of funding is for replacement of the roof on both structures. Currently the Carriage House has an asphalt shingle roof and the main house is a shake roof that is reaching the end of its normal life span. Both structures would receive a new shake roof, accurate to the original construction style.

Water Fund

CAPITAL IMPROVEMENTS PLAN

WATER FUND - 31

ASSUMPTIONS

1. The primary basis for project selection and priorities include:
 - Water Master Plan recommendations,
 - Maintenance records,
 - Size - all lines under 6" should be replaced to provide pressures for adequate fire flows and the ability to connect standard 6" fire hydrants and meet State Health Department Standards,
 - Infrastructure projects nearby - all water projects should be coordinated with street projects so as not to cause damage to recently improved streets and duplication of work,
 - Age and materials - older lines are generally constructed of substandard materials or are deteriorating, and should be replaced with materials meeting current standards, and
 - Demand - all lines less than 6" serving more than four houses are very critical and should be higher priority.
 - Studies and Reports (i.e. Water system Computer Modeling, Arsenic Study, WTP Engineering Study, et al)
2. There should be a balance of improvements to all parts of the water system. Each year there should be improvements to supply, transmission, treatment, distribution, feeder lines and storage of potable water.
3. Staffing level and equipment capabilities in the Line Maintenance Division will not increase or decrease and present abilities to replace lines will remain stable. This division can currently install lines up to 8" in diameter.
4. All Projects will be scheduled on a PAYGO basis until and unless the voters approve revenue bonds.
5. Revenues from the Capital Improvements Charge (CIC) shall be used for water line replacement and construction of new lines.
6. Voters approved a water rate increase on September 12, 1995 to fund additional wells and distribution lines.
7. Voters approved an incremental water rate increase on May 10, 1999 for high volume residential users to promote water conservation and pay for increased water supply beyond the resources available.
8. On March 7, 2006, the voters approved a water rate hike to fund an increase in water capacity and enhanced maintenance at the water treatment plant, as well as new treatment units to reduce taste and odor problems. Cost overruns are shown as PayGo expenses.
9. New funding for eighteen paygo projects are included for funding in FYE20 totaling \$10,192,130.

PROJECT TITLE:	Asset Management Plan	PROJECT TYPE:	Water System	Maint.
PROJ. CATEGORY:	Water System	PROJECT NUMBER:	WA	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	031-	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/19	to 6/30/22
WARD(s):		LIFE EXPECTANCY:	40 years	

DETAILED PROJECT DESCRIPTION:

Perform Risk Based Assessment of water distribution system assets to better prioritize distribution system maintenance and replacement. Management of these assets is necessary to maximize the benefit of waterline replacements. Current assessments based on age, pipe material, diameter and frequency of repair will be supplemented by this GIS based system allowing better communication of needs to the NUA/rate payers and aids in knowledge transfer from current employees to future employees. Factors which may be considered are consequence of failure (loss of service, difficulty of repair, damage to property, public image, and regulatory impact) as well as asset condition (age, material, performance, repair history, soil conditions, water quality, and annual maintenance cost). Infomaster computer program (estimated at \$30K) combined with InfoWorks water and sewer models will allow better prioritization of future capital needs.

PROJ. CATEGORY:	Water and Wastewater Systems	PROJECT NUMBER:	WA/WW	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	031/321	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/18	to 6/30/20
WARD(s):		LIFE EXPECTANCY:	40 years	

DETAILED PROJECT DESCRIPTION:

Project will design and construct water distribution and sewage collection facilities to serve Corporate Addition (as preliminary platted) as well as a small additional area east of the round-about. Water improvements consist of about 1,350 feet of 12-inch waterline which connects the existing waterlines along John Saxon Blvd. and the waterlines in Norman Business Park (this loop is required). The sewer improvements consist of about 1200 feet of very deep 8-inch sewer lines constructed going south to the southern boundary of Corporate Addition and then east about 800 feet to the ean of the gravity service area. Development further east must be served by a lift station.

---	---

DETAILED PROJECT DESCRIPTION:

This project will install approximately 6 miles of 24-inch treated waterline from OKC to allow purchase of an additional 6 MGD of treated water from OKC. Connection point would likely be in NE Norman, possibly 12th NE or 24th NE and could act a potential blending point for non-potable groundwater and treated water. Costs taken from Table 3.7 of 2060 Strategic Water Supply Plan. 31,680 LF 24-inch at \$335 per LF plus \$563K for flow metering vault (2012 costs). This project could be considered as an alternative to the proposed groundwater treatment plant.

PROJECT TITLE:	Waterline Maintenance Plan (40-Year)	PROJECT TYPE:	Water System	Improv.
PROJ. CATEGORY:	Water Line Maintenance Misc Projects	PROJECT NUMBER:	WA	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	031-9521-462	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/21	to 6/30/61
WARD(s):	all	LIFE EXPECTANCY:	50 Years	

DETAILED PROJECT DESCRIPTION:

The project assumes increasing water rates or creation of a Water Maintenance Fund similar to the Sewer Maintenance Fund. GIS records were researched to determine the approximate footage of older waterlines 12 inches in diameter and smaller that are constructed of ductile iron pipe, cast iron pipe, asbestos cement pipe, galvanized pipe or pipes with unknown material makeup. Generally, these pipes comprise about 60% of the total system and have outlived their design life due to age, material type, deterioration, or pipe diameter being less than current minimum of 6 inches. Existing users are expected to pay for these maintenance related issues or to upsize pipe diameter or material to meet current standards. Generally, new pipe will be PVC or HDPE.

SUBJECT TO NEW FUNDING AVAILABILITY

		0								
	Total	3,460,000	0	479,870	2,980,130	0	0	0	0	0

OPERATING IMPACT: positive Water Fnd

STATUS & COMMENTS:

Project costs reduced from FYE18 estimates. Modeling has determined existing waterlines sizes are adequate and do not need to be upsized. Additionally, short segment along Rock Creek from Flood to 12th NW completed under separate project; costs reduced from \$3.7M to \$2.1M.
 For FYE20, add 5,800 feet 16-inch Waterline replacement from Robinson to Rock Creek to this project; additional cost estimated at \$1.3 M.
 Consider using old 16-inch waterline to convey non-potable well water to future groundwater WTP to NE.

PROJECT TITLE:	WL Replacement: Franklin: RR to 12th NW	PROJECT TYPE:	Water System	Improvmt.
PROJ. CATEGORY:	Water Line Maintenance Misc Projects	PROJECT NUMBER:	WA	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	031-9521-462	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/24	to 6/30/26
WARD(s):	4	LIFE EXPECTANCY:	50 Years	

DETAILED PROJECT DESCRIPTION:

Water Distribution Projects: The proposed water distribution system improvements are broken out by location and assume that funding will be pro-rated between development related and maintenance related needs. Line replacements are generally required due to age, material type and the current state of deterioration. Existing users are expected to pay for maintenance related costs while increasing the size of a waterline is a development related cost to be paid by connection fees or impact fees. Costs are pro-rated by comparing the internal area of the existing pipe to the area of the enlarged pipe.

Franklin Road from Railroad to 12th NW then north to Indian Hills: Replace 10,700 LF 8" DIP with 12" PVC. Estimated cost of \$1.9M is pro-rated 67% to existing customers (\$1.3M) and 33% to new development (\$0.6M).

PROJECT TITLE: Water Line Replacement: Hall Park, Phase 2 PROJ. CATEGORY: Water Distribution System DEPARTMENT: Utilities MANAGER: Mark Daniels WARD(s): 5	PROJECT TYPE: Water System Maint. PROJECT NUMBER: WA ACCOUNT NUMBER: 031- BEGIN & END DATES: 7/1/20 to 6/30/22 LIFE EXPECTANCY: 50 Years
---	--

DETAILED PROJECT DESCRIPTION:

Project will replace ductile iron pipe (DIP) water lines in the Double Tree area of the Hall Park subdivision along Oak Forest, Timbercrest, Five Oaks, Wood Hollow, Timberwood and Burning Tree. The DIP is not compatible with the corrosive clay soils and is rupturing causing extensive damage to driveways, streets, and yards. Project of this scope exceeds ability of Water Line Maintenance Division to perform on an annual basis. Approximately 4,700 feet of 4" and 6" DIP will be replaced with C900 PVC pipe.

CITY OF NORMAN

PROJECT TITLE: Master Meters Installation PROJ. CATEGORY: Water Distribution Lines DEPARTMENT: Utilities MANAGER: Chris Mattingly WARD(s): All	PROJECT TYPE: Water System Improvt. PROJECT NUMBER: WA0173 ACCOUNT NUMBER: 031-9360-462 BEGIN & END DATES: 7/1/11 to 6/30/20 LIFE EXPECTANCY: 20 Years
---	--

DETAILED PROJECT DESCRIPTION:

Norman has several government owned facilities that are exempted from permitting processes required of other applicants. Over the years, agreements regarding waterline construction and metering devices installed on private property have been forgotten or ignored. In some cases, the city can no longer maintain the waterlines or the public health could be compromised. This project will install master meters, backflow prevention and valve vaults at the points where public waterlines enter private property. Internal lines will be privately maintained. It is expected that 3 meters will be installed at Moore-Norman Votech, and Postal Training Facility with 2 meters each at JD McCarty and Oklahoma Veterans Center requiring 10 master metering locations costing about \$25,000 each. Under this project, 6-inch or 8-inch master meters will be installed at city cost and utilized for billing purposes. Existing city meters, internal to the facility, will be removed. This system will relieve the city of maintenance responsibility of internal waterlines that have not been dedicated to the city via utility easements, substandard construction and/or waterlines no longer accessible for maintenance.

PROJECT TITLE: Large Water Meter Testing PROJ. CATEGORY: Water Meters DEPARTMENT: Utilities MANAGER: David Hager WARD(s): All	PROJECT TYPE: Water System PROJECT NUMBER: WA0241 ACCOUNT NUMBER: 031- BEGIN & END DATES: 7/1/17 to 6/30/20 LIFE EXPECTANCY: 5 years
---	--

DETAILED PROJECT DESCRIPTION:

In 2007 the Utilities Department replaced all 3-inch through 8-inch water meters and retrofitted them with an Automatic Meter Reading (AMR) system. The radio transmitter register (RTR) is recommended to be replaced every 15 years due to design life of the internal battery. This project will test all of the meters, replace RTR registers and water meters which are testing under the AWWA's (American Water Works Association) recommended testing accuracies for water meters.

EXPENDITURE SCHEDULE through CITY Accounts by FY

CITY OF NORMAN

PROJECT TITLE: Water Tower - High Pressure Plane PROJ. CATEGORY: Water Towers DEPARTMENT: Utilities MANAGER: Mark Daniels WARD(s): All	PROJECT TYPE: Water System Improvt. PROJECT NUMBER: WA0293 ACCOUNT NUMBER: 031-9354-462 BEGIN & END DATES: 7/1/08 to 6/30/26 LIFE EXPECTANCY: 50 Years
--	---

DETAILED PROJECT DESCRIPTION:

As the City of Norman continues to grow, additional elevated water storage will be needed to maintain water pressure during periods of peak demand and provide additional fire fighting capability. It is proposed that another 1.0 million gallon elevated storage tank be constructed in northeastern Norman in the high pressure plane (HPP).

PROJECT TITLE: Water Tower Maintenance - Boyd Tower PROJ. CATEGORY: Water Towers DEPARTMENT: Utilities MANAGER: Chris Mattingly WARD(s): 2	PROJECT TYPE: Water System Maint. PROJECT NUMBER: WA0039 ACCOUNT NUMBER: 031-9354-462 BEGIN & END DATES: 7/1/11 to 6/30/22 LIFE EXPECTANCY: 10 Years
---	--

DETAILED PROJECT DESCRIPTION:

To continue to store drinking water in a safe environment, water towers must be continually maintained. Water tower inspection and resurfacing occurs on an approximate 10 year cycle; the Boyd Tower located near 2400 W. Boyd was last coated in May 2012. During resurfacing, structural defects and deterioration were rehabilitated in order to extend the life of the tower. Additionally, a mixing device was considered though not installed to improve circulation and prevent accumulation of stagnant water in the water tower. Summer 2017 water treatment staff tested and identified stagnant water related to this tank. Staff recommends moving forward with the installation of a mixer in FYE19 at a cost of \$200K plus \$30K design; a similar mixer was installed on Robinson Tower and water tests proved that it was a success. Additionally, the APAI water modeling project identified that 300 LF 12-inch and 800 LF 8-inch water needs to be installed along Boyd to improve water movement and decrease water age in the tower; the estimated construction cost is \$290K plus 15% for design (\$44K).

CITY OF NORMAN

PROJECT TITLE:	Water Tower Maintenance - Lindsey Tower	PROJECT TYPE:	Water System	Maint.
PROJ. CATEGORY:	Water Towers	PROJECT NUMBER:	WA0182	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	031-9354-462	
MANAGER:	Chris Mattingly	BEGIN & END DATES:	7/1/09	to 6/30/20
WARD(s):	2	LIFE EXPECTANCY:	10 Years	

DETAILED PROJECT DESCRIPTION:

To continue to store drinking water in a safe environment Norman needs to maintain their water towers on a continual basis. The Lindsey Street Tower was last addressed by resurfacing the interior of the tank in 1993. It is recommended that the existing towers be resurfaced on a 10 year rotation. During resurfacing, structural defects or deterioration will be rehabilitated in order to extend the life of this tower.

Staff has reconsidered the resurfacing of Lindsey Water Tower. Several factors such as lead paint, location regarding lead paint abatement, and poor circulation/stagnant water were considered against tearing down and replacing the tank with a new one located in a more useful part of Norman. Additionally, a new monopole is being built which will allow the NUA to honor the existing cell phone tower contracts. Therefore, this budget projection allows for the funds to demolish and remove the tank from service. Staff is having another water model ran since new apartments have been built and more are proposed in this area.

---	---

DETAILED PROJECT DESCRIPTION:

This project assumes augmentation of Lake thunderbird with highly treated effluent (indirect reuse) is approved by ODEQ before 2025 and initial design begins in 2025. The project costs are taken from the 2060 Strategic Water Supply Plan, Portfolio 14 and generally consists of (1) a 3 MGD sidestream WRF treatment facility (\$12.2M), (2) an effluent pump station and 3.9 miles of 30-inch force main conveying reclaimed water from the WRF to Dave Blue Creek (\$21.9M), (3) 7 miles of 30-inch parallel pipeline from the Lake Thunderbird to the WTP (\$44.9M), and (4) a 3 MGD expansion to the WTP (\$8.8M). SWSP costs have been inflated forward at 3% per year to the expected start in 2025.

PROJECT TITLE: New Building for Line Maintenance PROJ. CATEGORY: Bldgs & Gnds DEPARTMENT: Utilities MANAGER: David Hager WARD(s): All	PROJECT TYPE: Water System Improvt. PROJECT NUMBER: ACCOUNT NUMBER: BEGIN & END DATES: 7/1/18 to 6/30/21 LIFE EXPECTANCY: 10 years
---	---

DETAILED PROJECT DESCRIPTION:

The Line Maintenance Division consisting of administrative staff, and water and sewer line maintenance sections are located on the North Base property; they are housed adjacent to the Fleet offices and vehicle servicing areas. The existing 11,000 SF building area housing administrative offices, the employee breakroom, fire hydrant/meter repair area as well as a storage area for numerous water and sewer line repair parts, replacement meters/firehydrants, etc. A separate building is provided for pump repair parts and a work area for pump repairs and testing. This CIP assumes construction of a new 20,000 SF facility and appurtenances NW of the water treatment plant at an estimated cost of \$100 per square foot (SF) with design estimated at 10% of the building cost.

PROJECT TITLE:	Reactivate Arsenic Wells & 3 MGD GWTP	PROJECT TYPE:	Water System
PROJ. CATEGORY:	Water Treatment Plant	PROJECT NUMBER:	WA
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/23 to 6/30/27
WARD(s):	All	LIFE EXPECTANCY:	20 yrs

DETAILED PROJECT DESCRIPTION:

This project considers our western well field as non-potable water and assumes 3.0 MGD of groundwater from 10 wells no longer in use will be conveyed via non-potable waterlines (estimated at \$5.2M) to 12th Ave NE and Franklin Road for treatment prior to distribution to our customers. The non potable waterline is estimated to total 7 miles; this price includes acquisition of a 10-foot wide easement, design, and construction. Wells are assumed to require rehabilitation costs of \$1.3M prior to delivery to the WTP. With an arsenic MCL of 10 PPB, the new treatment facility would likely be a microfiltration WTP costing \$12.4M to construct for an estimated total project cost of \$19.0 million.

OPERATING IMPACT:

positive Water Fnd

STATUS & COMMENTS:

On 06/24/08, the NUA approved Contract K-0708-155 with the Oklahoma Regional Water Utilities Trust (ORWUT) to participate in the SE Oklahoma Raw Water Study prepared by CDM and finalized in January 2009. The proposed project is to be completed in phases. Phase I is to be in place by 2020 and is expected to include a parallel 90-inch raw water line (with 6 pump stations) from Lake Atoka to Lake Stanley Draper and was estimated at \$1.08 Billion. Phase II is to be in place by 2030 and includes a raw water line from the Kiamichi River to Lake Atoka estimated at \$312M and the purchase of Lake Sardis water rights estimated at \$81M. OKC now expects new raw water line to be 66-inch with a third line constructed as demand warrants. OKC has completed a Cost of Service Study and expects its water rates to increase 4 to 7% annually through 2060.

ANNUAL BUDGET

CITY OF NORMAN

PROJECT TITLE:	12 MGD GWTP for Chromium/Arsenic	PROJECT TYPE:	Water System
PROJ. CATEGORY:	Water Treatment Plant	PROJECT NUMBER:	WA
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	31
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/23 to 6/30/26
WARD(s):	All	LIFE EXPECTANCY:	20 yrs

DETAILED PROJECT DESCRIPTION:

Due to increasing public concerns and a potential reduction in the maximum contaminant level (MCL) for Chromium 6 as well as other naturally occurring metals in the Garber Wellington Aquifer, alternatives have been developed to reduce levels of these substances. This project considers groundwater from our entire well field as non-potable and assumes a new Chromium MCL of 10 parts per billion (PPB). This project also assumes (1) non-potable water from 7 southern wells will be blended with treated water from our existing WTP to meet the MCL (see Well Field Blending at WTP), (2) 10 wells abandoned due to arsenic levels are rehabbed, transported to and treated at a new GWTP (see 3 MGD Arsenic GWTP), and (3) 10 new wells from the FYE16 Water Wells project are also completed and assumed to provide an additional peak capacity of 3 MGD. Thus, a peak groundwater flow of 12 MGD from 40 wells (8 MGD average daily flow) will be conveyed via non-potable waterlines to the city owned site located at 12th Ave NE and Franklin Road for treatment prior to distribution to customers. Approximately 25 miles of non-potable waterlines are expected to be constructed at an estimated cost of \$17.5M. With an MCL of 10 PPB for arsenic and Chromium 6, the new microfiltration GWTP is expected to be required at an estimated cost of \$41.4M. The estimated project timeline is to begin design (\$11.3M) and ROW acquisition (\$1.5M) in FYE23 followed by construction (\$58.9M) in FYE24 through FYE25 for a total project cost of \$71.8M. Note the timeline has been moved back two years due to a changed political scenario.

Since the majority of the improvements are related to treatment of an existing water source, the improvements should likely be paid for through water rates or other non-impact related fees. Treatment costs are taken from Assumption Tables provided in the 2060 Strategic Water Supply Plan (2012 costs); distribution costs were developed by NUA staff in 2013.

EXPENDITURE SCHEDULE through CITY Accounts by FY

PROJECT TITLE:	WTP: Land Purchase	PROJECT TYPE:	Water System	Improvmt.
PROJ. CATEGORY:	Water Treatment	PROJECT NUMBER:		
DEPARTMENT:	Utilities	ACCOUNT NUMBER:		
MANAGER:	Chris Mattingly	BEGIN & END DATES:	7/1/20	to 6/30/21
WARD(s):	All	LIFE EXPECTANCY:	10 years	

DETAILED PROJECT DESCRIPTION:

The existing water treatment plant site is fully utilized. The 2060 Strategic Water Supply Plan projects the need for an additional 13 million gallons per day (MGD) of treated water supply to reach our projected 2060 average daily demand of 29 MGD. The additional capacity at the WTP varies between 11 and 13 MGD depending upon whether 2 MGD of additional groundwater supply is selected for inclusion in our water supply portfolio. Additional land will be required under any scenario for expansion of the WTP. Tracts of at least 30 acres and up to 160 acres are needed and may be available; this CIP assumes purchase of 160 acres of land at an average cost of \$10,000 per acre.

PROJECT TITLE:	WTP: Raw Waterline (Phase 2)	PROJECT TYPE:	Water System	Improv.
PROJ. CATEGORY:	Raw Waterline	PROJECT NUMBER:	WA	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	031-9356-462	
MANAGER:	Chris Mattingly	BEGIN & END DATES:	7/1/19	to 6/30/21
WARD(s):	5	LIFE EXPECTANCY:	50 years	

DETAILED PROJECT DESCRIPTION:

SUBJECT TO FUNDING AVAILABILITY

This project will install a new raw waterline from the Water Treatment Plant to the Lake Thunderbird Intake. The current line has 33- and 30-inch diameters over approximately 8.5 miles and limits the plant capacity of 14 MGD. The proposed 48-inch line is expected to deliver about 42 million gallons per day (MGD) which is equivalent to the projected surface water supply needs through 2060. Constructing the line parallel to the existing line will provide redundancy as it will allow the existing raw waterline to be taken off line for maintenance purposes without disrupting the water supply to the citizens of Norman.

The Phase 2 project assumes construction of the remaining 6.5 miles of 48" waterline to the Lake Thunderbird Intake in 2020; 2.5 miles from the WTP to 60th NE was replaced in Phase 1. As the future unfolds regarding the importation of reuse water or SE Oklahoma water, an alternate connection could be sought. Option 2 also includes approximately 6.5 miles of piping going due north on 60th NE to Lake Stanley Draper. Option 3 includes piping reuse water to a future terminal reservoir and constructing approximately 3 miles of raw water piping to the end of Phase 1; under this option a treated effluent line with a length of about 7.5 miles would also be required.

EXPENDITURE SCHEDULE through CITY Accounts by FY

Account Number	Cost Element	TOTAL ALL FISCAL YRS	Actual Prior Years	Budget FYE 2019	FYE 2020	FYE 2021	FYE 2022	FYE 2023	FYE 2024	Beyond 5 Years

OPERATING IMPACT:

moderate	Water Fnd	new line will require maintenance
----------	-----------	-----------------------------------

STATUS & COMMENTS:

This assumes all costs to be borne by City of Norman rather than shared by other COMCD members: Del City and Midwest City.

Raw Water line cost estimates prepared in 2007 by Garver Engineers are increased 2.5% per year to account for inflation; design and ROW assumed to be completed in FYE23 and with construction in FYE24. Completion of a terminal reservoir could delay or shorten the length of the second phase of raw water line construction. Project moved back to FYE2023.

OPERATING IMPACT: high Water Fnd maintain asset

STATUS & COMMENTS:

The current site for residual disposal is projected to be full in 20 years. Residual disposal is a daily, on-going, critical part of the treatment process. An Emergency Operations Center and a new Operation Center for the Line Maintenance Division are being constructed on sites where the Division currently buries residual waste. It is expected the Division will get pressure from homeowners and city staff when we are hauling sludge because of dirt and dust generated by the work. In addition it will take some time to find and get a new site permitted for disposal. Cost estimates are preliminary and additional study is needed to accurately project future costs.

DEPARTMENT:	Utilities	ACCOUNT NUMBER:	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/11 to 6/30/16
WARD(s):	All	LIFE EXPECTANCY:	20 yrs

DETAILED PROJECT DESCRIPTION:

SUBJECT TO FUNDING AVAILABILITY:

This project will consider our well field as non-potable water and assumes a new Chromium MCL of at least 20 parts per billion (PPB) to be promulgated in 2016. Under this scenario, non-potable waterlines from 14 southern wells can be blended with treated water from our existing WTP to meet an MCL of 20 PPB in our distribution system. The non-potable waterline is estimated to total 9 miles at a cost of \$3.8 million. This price per mile includes a 10-foot wide easement, easement acquisition, surveys, design, construction, and site restoration. With an MCL of 20 PPB, a new treatment facility would likely be constructed under a separate project.

PROJECT TITLE: WTP: Raw Water Reservoir PROJ. CATEGORY: Reservoirs DEPARTMENT: Utilities MANAGER: Mark Daniels WARD(s): 5	PROJECT TYPE: Water System Improvt. PROJECT NUMBER: WA ACCOUNT NUMBER: 031-9353-462 BEGIN & END DATES: 7/1/22 to 6/30/25 LIFE EXPECTANCY: 50 years
---	---

DETAILED PROJECT DESCRIPTION:

SUBJECT TO FUNDING AVAILABILITY

This project will allow acquisition of about 215 acres of land for siting and construction of a raw water storage reservoir. The reservoir will tentatively be located about midway between Lake Thunderbird and the water treatment plant. The project will allow about 2 billion gallons of raw water to be stored at the reservoir during low water production periods for later transport to the water plant through a new 48-inch raw water supply line. "Excess or bonus" raw water can be pumped to storage during wet weather periods (when the lake is above flood pool). This water is assumed to not count against Norman's average allocation of 8.34 million gallons per day; thus allowing additional surface water usage without exceeding our allocation.

Reservoir construction will position the City for utilizing reuse water or SE Oklahoma water in the future as well as allow phasing of the new raw water line construction. The reservoir will also provide redundancy as it could allow short-term maintenance of the existing raw water pumping and transmission system.

PROJECT TITLE:	Water Line Replacement - Hot Soils	PROJECT TYPE:	Water System
PROJ. CATEGORY:	Water Line Replacement	PROJECT NUMBER:	WA Maintenance
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	031-9344-462.
MANAGER:	David Hager	BEGIN & END DATES:	7/1/18 to 6/30/24
WARD(s):	All	LIFE EXPECTANCY:	40-50 years

DETAILED PROJECT DESCRIPTION:

These deteriorated water lines are currently experiencing problems due to corrosive soil conditions. Projects listed need attention now or in the immediate future. Projects will purchase materials for installation by Division staff.

**Water Reclamation
Fund**

CAPITAL IMPROVEMENTS PLAN

WATER RECLAMATION FUND – 32

ASSUMPTIONS

1. Primary factors affecting project selection and priorities include:
 - Compliance with EPA administrative orders,
 - Relative impact on other parts of the sanitary sewerage system,
 - Maintenance history and service calls,
 - Inspections,
 - Wastewater Master Plan recommendations,
 - Accessibility,
 - Relative location downstream or upstream in the system, and
 - Coordination with nearby infrastructure projects.
2. Fund 32 is the Norman Utilities Authority Wastewater Reclamation Facility Fund that accounts for revenues associated with existing customers and ongoing accounts.
3. A 25 member, Council-appointed, Implementation Committee, will prioritize improvements to both the interceptors and the treatment plant with the assistance of staff. For interceptors, the committee might consider the following factors:
 - Sales tax funded project scope should be appropriate to allow funding on a “pay-as-you-go” basis.
 - Those interceptor segments shown to be most severely overloaded under the existing wastewater loading should be most highly rated. Similarly, those becoming overloaded under an obligated loading would have a higher priority than one becoming overloaded under full build-out. Expressed differently, those interceptors needing only a small increase in capacity to meet full build-out demands would have a higher priority than interceptors needing a large increase in capacity.
 - Downstream interceptor segments should generally be of higher priority than upstream segments. Interceptor projects in separate drainage basins can occur simultaneously as they are not interdependent.
 - Since excise tax funding is expected to lag behind sales tax funding, interceptor segments that are the same size under both the obligated and the full build-out scenarios might be funded first. Generally, this implies the service area is close to being fully developed, or a portion of the existing flow will be diverted to the proposed northern wastewater treatment plant.
 - Parallel interceptors might have a lower priority than a replacement interceptor might since additional rights-of-way may need to be acquired for parallel interceptors. Right-of-way/easement acquisition often delays project start-up.
 - The new interceptors serving existing customers in the Lift Station D service area must be timed to come on-line concurrently with the proposed northern wastewater treatment plant. Design and right-of-way acquisition for these interceptors might have a high priority while construction might be delayed several years.
4. In FYE 2015 Council approved transferring the sewer line maintenance operations out of the Sewer Line Maintenance Fund into the Water Reclamation Fund in order to better track the collection and distribution of the \$5 per month sewer maintenance fee.
5. New funding for 6 projects is proposed in FYE20 totaling \$4,179,000.

CITY OF NORMAN

PROJECT TITLE:	Phase 2 South WRF Improvements	PROJECT TYPE:	Wastewater System	Improv.
PROJ. CATEGORY:	WRF Systems	PROJECT NUMBER:	WW0065	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	032, 322, 323	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/11	to 6/30/18
WARD(s):	7	LIFE EXPECTANCY:	20 to 50 years	

DETAILED PROJECT DESCRIPTION:

The Wastewater Master Plan (WWMP) adopted in 2001 recommended expansion of the South Water Reclamation Facility (WRF) to 17 MGD and construction of a new 4.5 MGD North WRF. The citizens of Norman approved a 5-year sales tax to fund current needs (Fund 323) and an ongoing excise tax on new development to fund future needs (Fund 322).

The Phase 2 WRF Improvements include UV disinfection facilities as well as headworks screening improvements, influent flow splitting and measurement, renovation of existing primary clarifiers, three new aeration basins, replacement of diffusers in three existing aeration basins; additional blowers in the existing blower building, two new secondary clarifiers with new RAS/WAS pump station, a new post aeration facility, a new 66-inch outfall line, conversion of an existing secondary digester to a primary digester, two new thickening centrifuges, associated yard piping, electrical and instrumentation improvements.

OPERATING IMPACT: moderate Wstwr Fnd higher power costs to operate activated sludge basins and disinfection, reduced manpower and mainten

STATUS & COMMENTS:

Archer Western Construction began work in June 2014 and the Phase 1 work was complete in November 2015 while the Phase 2 work was complete in May 2017. Phase 2 Maintenance Improvements were complete in January 2018.

New work to replace approximately 15 remaining deteriorated steel metal doors with fiberglass doors; paint and perform miscellaneous repairs at the existing Blower Building, the existing Westside Lift Station, the Main Control Building Garage and the South Digester Floating Cover; and install building identification signage on all 17 buildings as required for identification in emergency situations.

PROJ. CATEGORY:	Wastewater Improvements	PROJECT NUMBER:	WW0170	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	032-9911-432	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/15	to 6/30/18
WARD(s):	7	LIFE EXPECTANCY:		

DETAILED PROJECT DESCRIPTION:

The project would allow the purchase of a 20 acre tract south and east of the existing WRF property and north of the compost facility; it is formerly known as the Naturalizer property. Project is amended to include potential purchase of the Potts Farm where treated wastewater sludge is land applied for beneficial reuse. 147 acres of the 468 acre parcel is for sale; cost estimated at \$3000 per acre. Land purchase will eliminate annual lease payments to the Potts Family and secure sites for land application.

PROJECT TITLE:	WRF Non-Potable Reuse System	PROJECT TYPE:	Wastewater System	Improv.
PROJ. CATEGORY:	Non Potable Water System	PROJECT NUMBER:	WW0205	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	32	
MANAGER:	Mark Daniels	BEGIN & END DATES:	07/01/14	to 06/30/20
WARD(s):	7 5	LIFE EXPECTANCY:	20 years	

DETAILED PROJECT DESCRIPTION:

A non-potable water system to allow reuse of treated effluent for wash down of equipment and irrigation of the WRF site was completed in 2011. Chlorinated wastewater effluent may also be used for irrigation purposes offsite and can be cost effective when high volume users located near the WRF are willing to utilize the wastewater. Non-potable reuse can significantly reduce peak summertime water demand and delay the need for expensive water supply projects. Reuse will also reduce the amount of pollutants discharged to the Canadian River.

It is proposed to construct a reuse line from the WRF along Cedar Lane to 12th NE, 24th NE, to Imhoff & 24th Ave. SE and serve major industrial users along the route. A second phase could deliver reuse water to the Trails Golf Course near Berry Road and Highway 9.

		0								
	Total	4,182,800	0	1,008,800	0	3,174,000	0	0	0	0

OPERATING IMPACT: positive Wstwr Fnd reduced use of potable water for irrigation

STATUS & COMMENTS:

NUA will be installing 24-inch Segment D Waterline along Jenkins between Timberdell and Hwy 9 in Summer 2018. Non-potable treated effluent reuse pipeline for irrigation purposes is ultimately proposed between WRF and Lindsey Water tower/Duck pond area. Additional \$510K funding in FYE19 will allow installation of a parallel 16-inch or 20-inch diameter reuse water line at same time as potable waterline; pipe will be temporarily capped until remainder of system can be designed and constructed. Due to higher priority to reuse treated effluent by augmenting Lake Thunderbird, irrigation project delayed until FYE21; inflate costs at 2.5% from 2009

PROJECT TITLE: Brookhaven Creek Interceptor Replacements PROJ. CATEGORY: Wastewater Collection System DEPARTMENT: Utilities MANAGER: Mark Daniels WARD(s):	PROJECT TYPE: Wastewater System Improvt. PROJECT NUMBER: WW ACCOUNT NUMBER: 032/322 BEGIN & END DATES: 7/1/30 to 6/30/35 LIFE EXPECTANCY: 50 years
---	--

DETAILED PROJECT DESCRIPTION:

Under the Wastewater Flow Monitoring project (WW0042), HDR Engineering completed city-wide flow monitoring and wastewater modeling to simulate the affect a 5-year 4-hour design storm on the existing collection system. Thirty-two flow meters and ten rain gauges utilized to collect dry and wet weather flow data and project wastewater loading under full buildout of the 2025 Land Use Plan. Capacity analysis report recommended improvements neccessary to prevent overflow during the design storm at full buildout.

Approximately 6,600 feet of sewer lines in the Brookhaven Creek wastewater basin (Table 4-3) may need improvement over the next 10 to 30 years; improvements are delayed at this time since sewer system overflows are very infrequent at this time and since ongoing sewer replacements under the Sewer Maintenace Plan may continue to decrease infiltration and inflow into the collection system.

PROJECT TITLE:	South WRF Phase 3 BNR Improvements	PROJECT TYPE:	Wastewater System	Improv.
PROJ. CATEGORY:	Wastewater Improvements	PROJECT NUMBER:	WW	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	032/323-9048-432	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/19	to 6/30/24
WARD(s):	All	LIFE EXPECTANCY:	50 years	

DETAILED PROJECT DESCRIPTION:

The Wastewater Master Plan recommended expansion of the South WRF to 17 MGD. The engineering report for the South WRF Improvements identified the Phase 2 Improvements as well as anticipated improvements necessary to upgrade treatment processes to improve effluent quality and possibly allow indirect potable reuse. It is assumed the Phase 2 South WRF improvements are in place prior to this project. The Phase 3 improvements will likely include the addition of biological nutrient removal (BNR) to reduce phosphorus and nitrogen and an effluent pump station followed by filtration to further reduce solids. This phase would be required if our effluent discharge permit is made more stringent or if reuse of highly treated effluent for water supply use is implemented. It is assumed that DEQ regulations allowing indirect reuse will become effective in 2020.

	Total	105,300,000	0	0	0	0	0	2,080,000	2,080,000	101,140,000

OPERATING IMPACT:

high Wstwr Fnd higher power costs to operate BNR basins and effluent pump station

STATUS & COMMENTS:

Project costs originally taken from the Phase 2 WRF Expansion engineering report dated November 2011. Costs were updated in a 2015 report to the COMCD regarding augmentation with 15 MGD of effluent to Lake Thunderbird. Construction of effluent pipeline to Dave Blue Creek and BNR treatment reduce turbidity, phosphorus and nitrogen to typical augmentation levels are included and inflated to 2023. Design and inspection is based on 20% of total construction cost. The revised cost estimate shown above assumes the following:

- Design of the WRF BNR expansion is initiated in FYE23 while construction is initiated in FYE26.
- Cost sharing for the filtration design & construction is 18%/82% (excise tax/wastewater fund) based on the obligated flow of 13.9 MGD and the design flow of 17.0 MGD; $13.9/17.0 = 81.8\%$. The citizens of Norman approved an ongoing sewer excise tax (SET) on new development to fund future needs (Fund 322) while the wastewater fund (032) is assumed to pay for existing or obligated needs. Project is moved back one year so design would be initiated in FYE23; costs are inflated 2.5%.

OPERATING IMPACT:

high Wstwr Fnd

STATUS & COMMENTS:

Project costs taken from the Phase 2 WRF Expansion engineering report dated November 2011. Original construction cost have been adjusted at 2.5% per year from 2011 to 2025 to allow for inflation. Design and inspection is based on 20% of total construction cost. Due to relatively low electrical costs, the ongoing Phase 2 WRF Expansion will install emergency generators and several facilities in lieu of more expensive gas storage sphere and co-generation facilities. This project may be reconsidered at a later date.

PROJECT TITLE: WRF Reuse Pilot Study PROJ. CATEGORY: Wastewater Improvements DEPARTMENT: Utilities MANAGER: Mark Daniels WARD(s): All	PROJECT TYPE: Wastewater System Improvt. PROJECT NUMBER: WW0317 ACCOUNT NUMBER: 032-9048-432 BEGIN & END DATES: 7/1/18 to 6/30/21 LIFE EXPECTANCY: 50 years
---	--

DETAILED PROJECT DESCRIPTION:

The Reuse Pilot Study improvements will utilize a portion of the recently expanded WRF and well as additional treatment process units provided to vendors to evaluate the WRF's capability to reduce typical wastewater parameters such as phosphorus and nitrogen as well as CECs (contaminants of Emerging Concern). The study will determine if existing and future treatment processes will remove pollutants of concern to levels acceptable for eventual discharge into Lake Thunderbird, and an effluent pump station followed by filtration to further reduce solids. This phase would be required if our effluent discharge permit is made more stringent or if reuse of highly treated effluent for water supply use is implemented. Costs for Pilot Study taken from report prepared by Garver for COMCD.

PROJECT TITLE:	WRF Septage Receiving Station	PROJECT TYPE:	Bldgs & Gnds	Improv.
PROJ. CATEGORY:	Wastewater System	PROJECT NUMBER:	WW0318	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	032-9911-432	
MANAGER:	Steven Hardeman	BEGIN & END DATES:	7/1/18	to 6/30/20
WARD(s):	7	LIFE EXPECTANCY:	20 years	

DETAILED PROJECT DESCRIPTION:

The Water Reclamation Facility (WRF) is often contacted regarding the possibility of taking trucked wastewater from hauling companies. Delivery of trucked wastes is not typically approved due to the undocumented quality of the trucked waste. The WRF could generate substantial revenue from companies hauling septage (septic tank clean-outs) and other acceptable wastes. To do so, a facility is required to temporarily store trucked wastes delivered to the WRF while water quality testing is performed to verify its acceptability. Preparation of an engineering study and design is budgeted for FYE19 while construction is budgeted the following year.

**Sewer Maintenance
Fund**

CAPITAL IMPROVEMENTS PLAN
SEWER MAINTENANCE FUND – 321

ASSUMPTIONS

1. Primary factors affecting project selection and priorities include:
 - Compliance with EPA administrative orders,
 - Relative impact on other parts of the sanitary sewerage system,
 - Maintenance history and service calls,
 - Inspections,
 - Wastewater Master Plan recommendations,
 - Accessibility,
 - Relative location downstream or upstream in the system, and
 - Coordination with nearby infrastructure projects.
2. New sources of revenue were approved by voters on August 14, 2001 became effective October 1, 2001 and are:
 - Sewer Maintenance (Fund 321) - \$5 per month, sewer service maintenance rate charged to each residence, apartment, business or mobile home receiving sewer service in the City; to be used for establishing an upgraded sewer maintenance program and not to pay debt service.
3. A 25 member, Council-appointed, Implementation Committee, will prioritize improvements to both the interceptors and the treatment plant with the assistance of staff. For interceptors, the committee might consider the following factors:
 - Sales tax funded project scope should be appropriate to allow funding on a “pay-as-you-go” basis.
 - Those interceptor segments shown to be most severely overloaded under the existing wastewater loading should be most highly rated. Similarly, those becoming overloaded under an obligated loading would have a higher priority than one becoming overloaded under full build-out. Expressed differently, those interceptors needing only a small increase in capacity to meet full build-out demands would have a higher priority than interceptors needing a large increase in capacity.
 - Downstream interceptor segments should generally be of higher priority than upstream segments. Interceptor projects in separate drainage basins can occur simultaneously as they are not interdependent.
 - Since excise tax funding is expected to lag behind sales tax funding, interceptor segments that are the same size under both the obligated and the full build-out scenarios might be funded first. Generally, this implies the service area is close to being fully developed, or a portion of the existing flow will be diverted to the proposed northern wastewater treatment plant.
 - Parallel interceptors might have a lower priority than a replacement interceptor might since additional rights-of-way may need to be acquired for parallel interceptors. Right-of-way/easement acquisition often delays project start-up.
 - The new interceptors serving existing customers in the Lift Station D service area must be timed to come on-line concurrently with the proposed northern wastewater treatment plant. Design and right-of-way acquisition for these interceptors might have a high priority while construction might be delayed several years.
4. In FYE 2015 Council approved transferring the sewer line maintenance operations out of the Sewer Line Maintenance Fund into the Water Reclamation Fund in order to better track the collection and distribution of the \$5 per month sewer maintenance fee.
5. Three projects are proposed for funding in FYE20 totaling \$2,800,000.

CITY OF NORMAN

PROJECT TITLE: Bishop Creek Interceptor Replacements PROJ. CATEGORY: Wastewater Collection System DEPARTMENT: Utilities MANAGER: Mark Daniels WARD(s):	PROJECT TYPE: Wastewater System Improvt. PROJECT NUMBER: WW ACCOUNT NUMBER: 321/322 BEGIN & END DATES: 7/1/19 to 6/30/35 LIFE EXPECTANCY: 50 years
---	--

DETAILED PROJECT DESCRIPTION:

Under the Wastewater Flow Monitoring project (WW0042), HDR Engineering completed city-wide flow monitoring and wastewater modeling to simulate the affect a 5-year 4-hour design storm on the existing collection system. Thirty-two flow meters and ten rain gauges utilized to collect dry and wet weather flow data and project wastewater loading under full buildout of the 2025 Land Use Plan. Capacity analysis report recommended improvements necessary to prevent overflow during the design storm at full buildout.

Approximately 20,600 feet of sewer lines in the Bishop Creek wastewater basin (Table 4-2) will need improvement to accomodate the full build-out wastewater flows; improvements are scheduled based on age and condition of the existing piping and the frequency of sewer system overflows. Ongoing sewer replacements under the Sewer Maintenance Plan may continue to decrease infiltration and inflow into the collection system and reduce the need for these improvements in the future.

OPERATING IMPACT:

slight	Wstwd Fnd	reduced infiltration and inflow, reduced probability of overflow and DEQ fines
--------	-----------	--

STATUS & COMMENTS:

2014 construction cost estimate was \$5.01M. Future construction cost estimates assume 2.5% annual increase in construction costs through assumed start date. FYE20 project includes replacement of aerial crossing over Bishop Creek north of Highway 9 and replacement of several large diameter sewer segments near this location between Constitution on the north, Dewey avenue on the west and Classen on the east. Remaining Bishop Creek projects are assumed to begin construction in 2030. Overall project cost has been inflated to \$8.3M.

PROJECT TITLE: Sanitary Sewer Emergency Repairs PROJ. CATEGORY: Line Maintenance DEPARTMENT: Utilities MANAGER: David Hager WARD(s): All	PROJECT TYPE: Wastewater System Maint. PROJECT NUMBER: WW0248, Maintenance ACCOUNT NUMBER: 321-9974-432.61-01 BEGIN & END DATES: 7/1/02 to 6/30/23 LIFE EXPECTANCY: 40 yrs.
---	---

DETAILED PROJECT DESCRIPTION:

This is an annual project to perform emergency repairs of sanitary sewer lines by outside contractor on an as-needed basis. Un-needed funds are returned to Wastewater Maintenance Fund (321) balance at end of each fiscal year. Location of repairs to be determined on a case by case basis when repairs are beyond the scope of Sewer Line Maintenance staff due to depth, location or manpower restrictions.

EXPENDITURE SCHEDULE through CITY Accounts by FY

---	---

DETAILED PROJECT DESCRIPTION:

In 2001, the citizen's of Norman approved a Sewer Maintenance Fee of \$5 per month per household to be deposited in the Sewer Maintenance Fund 321. New projects are funded annually with funding utilized for design, inspection and construction activities which will repair or replace our aging sewer collection system including sewer lines and lift stations.

Annual rehabilitation project is generally bounded by Westridge Terrace to the west, W. Boyd St. to the North, Wiley Road to the East, and Lindsey Street to the south. Additional lines may be added by staff if funding is available. Repair to or replacement of about 21,100 feet of sewer is needed in the project area, subject to adjustments by staff due to unforeseen system operational considerations. Alternates may be bid, but are not identified yet.

CITY OF NORMAN

PROJECT TITLE: Sewer Maintenance Project FY 2023 PROJ. CATEGORY: Sanitary Sewer Replacements DEPARTMENT: Utilities MANAGER: T.B.A. WARD(s): 6	PROJECT TYPE: Wastewater System Maint. PROJECT NUMBER: WW ACCOUNT NUMBER: 321-9338-432 BEGIN & END DATES: 7/1/22 to 6/30/24 LIFE EXPECTANCY: 50 Years
--	---

DETAILED PROJECT DESCRIPTION:

In 2001, the citizen's of Norman approved a Sewer Maintenance Fee of \$5 per month per household to be deposited in the Sewer Maintenance Fund 321. New projects are funded annually with funding utilized for design, inspection and construction activities which will repair or replace our aging sewer collection system including sewer lines and lift stations.

Annual rehabilitation project, generally bounded by Boyd St. to the North, Wiley Road to the West, Lindsey Street to the South, and Imhoff Creek/Pickard Ave. to the east; additional lines may be added by staff if funding is available. Repair or replacement of about 19,200 feet of sewer is needed in the project area, subject to adjustments by staff due to unforeseen system operational considerations. Alternates may be bid, but are not identified yet.

Chocolate Festival

**Sewer New
Development Fund**

CAPITAL IMPROVEMENTS PLAN

NEW DEVELOPMENT EXCISE TAX FUND –322

ASSUMPTIONS

1. Primary factors affecting project selection and priorities include:
 - Compliance with EPA administrative orders,
 - Relative impact on other parts of the sanitary sewerage system,
 - Maintenance history and service calls,
 - Inspections,
 - Wastewater Master Plan recommendations,
 - Accessibility,
 - Relative location downstream or upstream in the system, and
 - Coordination with nearby infrastructure projects.
2. New sources of revenue were approved by voters on August 14, 2001 became effective October 1, 2001 and are:
 - New Development Excise Tax (Fund 322) – an excise tax on new residential and commercial development to be served by the sewer system; to be used for future improvements and expansion to the city's wastewater system. The amount generated is dependent on growth, but is anticipated to be \$2 million per year. Projects will be funded primarily Pay Go and debt financed as needed.
3. A 25 member, Council-appointed, Implementation Committee, will prioritize improvements to both the interceptors and the treatment plant with the assistance of staff. For interceptors, the committee might consider the following factors:
 - Sales tax funded project scope should be appropriate to allow funding on a “pay-as-you-go” basis.
 - Those interceptor segments shown to be most severely overloaded under the existing wastewater loading should be most highly rated. Similarly, those becoming overloaded under an obligated loading would have a higher priority than one becoming overloaded under full build-out. Expressed differently, those interceptors needing only a small increase in capacity to meet full build-out demands would have a higher priority than interceptors needing a large increase in capacity.
 - Downstream interceptor segments should generally be of higher priority than upstream segments. Interceptor projects in separate drainage basins can occur simultaneously as they are not interdependent.
 - Since excise tax funding is expected to lag behind sales tax funding, interceptor segments that are the same size under both the obligated and the full build-out scenarios might be funded first. Generally, this implies the service area is close to being fully developed, or a portion of the existing flow will be diverted to the proposed northern wastewater treatment plant.
 - Parallel interceptors might have a lower priority than a replacement interceptor might since additional rights-of-way may be required for parallel interceptors. Right-of-way/easement acquisition often delays project start-up.
 - The new interceptors serving existing customers in the Lift Station D service area must be timed to come on-line concurrently with the proposed northern wastewater treatment plant. Design and right-of-way acquisition for these interceptors might have a high priority while construction might be delayed several years.
4. One project is proposed for funding in FYE20 in the amount of \$939,700.

CITY OF NORMAN

PROJECT TITLE:	SE Norman Lift Station Payback	PROJECT TYPE:	Wastewater System	Improvmt.
PROJ. CATEGORY:	Wastewater Collection System	PROJECT NUMBER:	WW	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	322-	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/16	to 6/30/24
WARD(s):	5	LIFE EXPECTANCY:	50 years	

DETAILED PROJECT DESCRIPTION:

The Wastewater Master Plan (WWMP) identified sewer interceptor needs throughout Norman to accomodate full build-out of the NORMAN 2025 Plan. The citizens of Norman approved an ongoing excise tax (Fund 322) to provide capacity for future development. Staff has recently updated the wastewater model to project flows generated from full build-out of the Destin Landing Development in SE Norman. A series of interceptors as well as one large lift station with flow equalization can eliminate one existing and three proposed lift stations in southeast Norman. This project will estimate project costs, assign wastewater generation estimates to undeveloped properties to be serviced, and prorate payback costs per parcel based on wastewater generation projections. The lift station might initially be funded by developers and/or the NUA with a portion of the funding paid back as additional areas develop.

EXPENDITURE SCHEDULE through CITY Accounts by FY

Account Number	Cost Element	TOTAL ALL FISCAL YRS	Actual Prior Years	Budget FYE 2019	FYE 2020	FYE 2021	FYE 2022	FYE 2023	FYE 2024	Beyond 5 Years

CITY OF NORMAN

PROJECT TITLE: Bishop Creek Interceptor Replacements PROJ. CATEGORY: Wastewater Collection System DEPARTMENT: Utilities MANAGER: Mark Daniels WARD(s):	PROJECT TYPE: Wastewater System Improvt. PROJECT NUMBER: WW ACCOUNT NUMBER: 321/322 BEGIN & END DATES: 7/1/19 to 6/30/35 LIFE EXPECTANCY: 50 years
--	---

DETAILED PROJECT DESCRIPTION:

Under the Wastewater Flow Monitoring project (WW0042), HDR Engineering completed city-wide flow monitoring and wastewater modeling to simulate the affect a 5-year 4-hour design storm on the existing collection system. Thirty-two flow meters and ten rain gauges utilized to collect dry and wet weather flow data and project wastewater loading under full buildout of the 2025 Land Use Plan. Capacity analysis report recommended improvements necessary to prevent overflow during the design storm at full buildout.

Approximately 20,600 feet of sewer lines in the Bishop Creek wastewater basin (Table 4-2) will need improvement to accomodate the full build-out wastewater flows; improvements are scheduled based on age and condition of the existing piping and the frequency of sewer system overflows. Ongoing sewer replacements under the Sewer Maintenance Plan may continue to decrease infiltration and inflow into the collection system and reduce the need for these improvements in the future.

EXPENDITURE SCHEDULE through CITY Accounts by FY

Account Number	Cost Element	TOTAL ALL FISCAL YRS	Actual Prior Years	Budget FYE 2019	FYE 2020	FYE 2021	FYE 2022	FYE 2023	FYE 2024	Beyond 5 Years

CITY OF NORMAN

PROJECT TITLE:	South WRF Phase 3 BNR Improvements	PROJECT TYPE:	Wastewater System	Improv:
PROJ. CATEGORY:	Wastewater Improvements	PROJECT NUMBER:	WW	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	032/323-9048-432	
MANAGER:	Mark Daniels	BEGIN & END DATES:	7/1/19	to 6/30/24
WARD(s):	All	LIFE EXPECTANCY:	50 years	

DETAILED PROJECT DESCRIPTION:

The Wastewater Master Plan recommended expansion of the South WRF to 17 MGD. The engineering report for the South WRF Improvements identified the Phase 2 Improvements as well as anticipated improvements necessary to upgrade treatment processes to improve effluent quality and possibly allow indirect potable reuse. It is assumed the Phase 2 South WRF improvements are in place prior to this project.

The Phase 3 improvements will likely include the addition of biological nutrient removal (BNR) to reduce phosphorus and nitrogen and an effluent pump station followed by filtration to further reduce solids. This phase would be required if our effluent discharge permit is made more stringent or if reuse of highly treated effluent for water supply use is implemented. It is assumed that DEQ regulations allowing indirect reuse will become effective in 2020.

	Total	105,300,000	0	0	0	0	0	2,080,000	2,080,000	101,140,000
OPERATING IMPACT:	high	Wstwr Fnd	higher power costs to operate BNR basins and effluent pump station							

STATUS & COMMENTS:

Project costs originally taken from the Phase 2 WRF Expansion engineering report dated November 2011. Costs were updated in a 2015 report to the COMCD regarding augmentation with 15 MGD of effluent to Lake Thunderbird. Construction of effluent pipeline to Dave Blue Creek and BNR treatment reduce turbidity, phosphorus and nitrogen to typical augmentation levels are included and inflated to 2023. Design and inspection is based on 20% of total construction cost. The revised cost estimate shown above assumes the following:

- Design of the WRF BNR expansion is initiated in FYE23 while construction is initiated in FYE26.
- Cost sharing for the filtration design & construction is 18%/82% (excise tax/wastewater fund) based on the obligated flow of 13.9 MGD and the design flow of 17.0 MGD; $13.9/17.0 = 81.8\%$. The citizens of Norman approved an ongoing sewer excise tax (SET) on new development to fund future needs (Fund 322) while the wastewater fund (032) is assumed to pay for existing or obligated needs. Project is moved back one year so design would be initiated in FYE23; costs are inflated 2.5%.

CITY OF NORMAN

PROJECT TITLE: North Water Reclamation Facility PROJ. CATEGORY: WRF Systems DEPARTMENT: Utilities MANAGER: Mark Daniels WARD(s): All	PROJECT TYPE: Wastewater System Improvt. PROJECT NUMBER: WW0204 ACCOUNT NUMBER: 322-, 323-9049-432 BEGIN & END DATES: 7/1/30 to 6/30/35 LIFE EXPECTANCY: 50 Years
--	--

DETAILED PROJECT DESCRIPTION:

The Wastewater Master Plan (WWMP) identified sewer needs throughout Norman to accommodate full build-out of the NORMAN 2020 Land Use and Transportation Plan; a new 4.5 MGD North Water Reclamation Facility (WRF) was a component of the WWMP. This project will include the cost of siting, permitting and constructing a new North WRF in the Little River drainage basin to serve the full build-out condition defined as urban area in the current Land Use and Transportation Plan. The Engineering Report (ER) under Project WW0204 is the first step toward obtaining a permit to design and construct the new WRF and will verify the estimated costs included herein. Engineering, permitting and construction of a WRF discharging to the Little River is estimated at \$85 million to \$95 million depending on whether reuse of effluent is permitted.

A

Total Maximum Daily Load (TMDL) Study would also need to be performed prior to discharge into either the Little River or the Canadian River; design and construction of the improvements would follow when required. For the purpose of this CIP, discharge to the Little River is assumed.

OPERATING IMPACT: positive Wstwr Fnd New infrastructure to serve existing and future customers

STATUS & COMMENTS:

In 2001, the citizens of Norman approved an ongoing sewer excise tax (SET); SET revenues fund capacity for development occurring after 2001. Based on the remaining obligated capacity being built as a part of the Phase 2 (South) WRF Improvements, the SET would fund 100% of the costs. Projected expenditures are estimated at beyond 5 years as the recently rehabilitated Lift Station D will adequately serve the North sewer basin for at least 10 to 15 years or about 2030. Estimates are 2012 costs and have not been inflated forward to time of implementation.

CAPITAL IMPROVEMENTS PLAN

SANITATION FUND - 33

ASSUMPTIONS

1. All Projects are scheduled on a Paygo basis and cannot be funded until and unless the voters approve a revenue rate increase and/or revenue bonds.
2. Revenues from the Sanitation Fees shall be used for construction of new facilities or maintenance of existing facilities.
3. Two projects are proposed for funding in FYE20 in the amount of \$210,000.

PROJECT TITLE:	Compost Facility Scale House	PROJECT TYPE:	Bldgs & Gnds	Improv.
PROJ. CATEGORY:	Building Improvements	PROJECT NUMBER:	SA00XX	
DEPARTMENT:	Utilities	ACCOUNT NUMBER:	033-9975-432	
MANAGER:	Bret Scovil	BEGIN & END DATES:	7/1/19	to 6/30/20
WARD(s):		LIFE EXPECTANCY:	10 Years	

DETAILED PROJECT DESCRIPTION:

Purchase and install portable metal building as scalehouse at Yard Waste Composting Facility located on Bratcher Minor Road west of Jenkins. Building will serve as scalehouse with toilet, work/storage room with one small office serving two full-time employees and visitors. Building will replace smaller prefab building purchased in about 2003 which is severely deteriorated and inadequate. Building size will be approximately 400 SF with HVAC (\$90,000). Project will also include provision of a computer/email (\$5000) and extension and re-connection of existing water, sewer and electric utilities (\$5,000). Design fees are included to allow competitive bidding for the purchase and installation of the building.

---	---

DETAILED PROJECT DESCRIPTION:

The old Transfer Station located at 3901 S. Chautauqua just south of SH 9 was built in 1985 and is in poor condition because of the heavy usage, especially the concrete floor, push walls, and metal exterior. This project will remove the push walls and tunnel, renovate the floor and exterior walls and allow the building to be converted to other uses in the future. This project is being amended to also include repairs/improvements to the newer transfer station constructed in 2008.

STATUS & COMMENTS:

Metal frame building for original transfer station has been demolished with concrete pad remaining; additional renovation on hold until ultimate use of the facility is determined. HVAC and electrical improvements to new transfer station being completed in FYE19. New funding is being provided to allow concrete flooring to be rehabilitated, fencing and gate repairs around the facility, and a new metal building (approx. 400 SF) for welding, and small equipment and tool storage.

ANNUAL BUDGET

Earth Day Festival in April

Midsummer Night's Fair

Capital Fund

CAPITAL IMPROVEMENTS PLAN

CAPITAL FUND – 50

ASSUMPTIONS

1. Capital Fund revenues are primarily received from 70% of the Second Cent Sales Tax, per referendum of September 1976. Their purpose is to finance General Fund related capital needs. Revenue amounts are projected to increase at annual growth rates based on trend line analysis.
2. New capital sales tax revenue will be generally allocated as follows:
 - 7% General Contingency – reserved for inflation and unanticipated needs;
 - 5% Maintenance of Existing Facilities – preventive maintenance needs;
 - 27% Capital Outlay – major equipment such as vehicles and computer hardware;
 - 25% Street Maintenance – life extending treatments to public streets and drainage ways, one street crew and one drainage crew; and
 - 36% Pay-As-You-Go (PAYGO) projects not eligible for an enterprise fund revenues, Debt Service for the 1992 General Obligation Bonds, transfer to Arterial Road Recoupment Fund and salaries for city personnel working on capital projects.

Allocation of New Sales Tax

3. Until a Drainage Utility is created for future funding of storm water drainage projects, such projects will be funded from capital sales tax revenues.
4. As feasible, the City will pursue funding from all eligible sources (such as the State and Federal governments, as well as private interests), when pursuing street and intersection improvements and it is assumed they will participate at the eligible funding levels.
5. Park development projects will be phased on a PAYGO basis, using city funds, private contributions, and Federal or state assistance. Park Development Fees (Fund 52) will also be available for construction of Community and Neighborhood Parks.
6. It is assumed that improvements and expansion of existing neighborhood parks is more important than acquiring and constructing new neighborhood facilities, unless it involves undeveloped neighborhood parks in areas with growing demand for services. Further, land desired for future community park and open space needs should be acquired at the earliest possible date in order to preserve it from being otherwise developed.
7. The City will explore the option of selling bonds to advance major projects, due to a lack of other available revenues.

ANNUAL BUDGET

8. Periodically, the private sector participates in project expenses through impact fees.
9. See Figures in the Appendix and individual project sheets for locations of specific projects.
10. Due to unexpected increase in materials and fuel costs, project expenses for those capital improvements approved in the March 31, 2005 Bond referendum are estimated to increase significantly more than the originally approved estimates. These are of the highest priority because of the commitment made to the electorate. Therefore, adjustments and reschedulings were made to other projects to accommodate these cost increases. The source of funding is the capital fund balance.
11. Beginning in FYE 2008, the Capital Fund began subsidizing the Westwood Fund by means of transfers. These funds are spent on capital projects and capital equipment. Specific items in the current budget and five year CIP are as follows:
 - FYE 2020 - Golf course equipment (\$18,000),
 - FYE 2021 – Golf cart replacements (\$42,000) and golf course equipment (\$19,500),
 - FYE 2022 – Golf cart replacements (\$42,000) and golf course equipment (\$19,500),
 - FYE 2023 – Golf cart replacements (\$42,000) and golf course equipment (\$19,500), and
 - FYE 2024 – Golf cart replacements (\$42,000) and golf course equipment (\$19,500).
12. The Electorate approved a sales tax for public safety (referred to herein as Public Safety Sales Tax, PSST) on May 13, 2008 and an extension of the PSST on April 1, 2014, earmarking part of the proceeds for construction, equipping and staffing of two new fire stations and other police and fire related capital purposes. These have been included in the capital budget as Fire Station 8, Fire Station 9 and the Smalley Center. The sales taxes will be transferred from the General Fund to the Capital Fund at the rate of expenditures.
13. In previous years, the Capital Fund paid for personnel working on capital projects by transferring from the Capital Fund to non-enterprise funds. Beginning in FYE 2012, salaries and benefits will be paid directly from the Capital Fund. Personnel include: 2 CIP Engineers, 1 Traffic Engineer, 1 Stormwater Engineer, 25% of an Engineering Assistant, 70% of a Park Planner I, 40% of a Park Planner II, 80% of a Utility Coordinator, 50% of a Construction Inspector, 80% of a Construction Inspector, and 75% of the Facility Maintenance Supervisor. Two new capital project engineers were added in FYE17.
14. In August, 2012 a General Obligation Bond referendum was approved (\$42,575,000) for street maintenance program. Some of these were previously partially funded with Capital Penny Sales Tax. The Pay-Go funding will be reallocated to other needs as Council reviews specific projects.
15. In April, 2016 a General Obligation Bond referendum was approved (\$25,360,000) for continuation of the previous street maintenance program with additional street locations. This is funded with a temporary sales tax.
16. In April, 2019 a General Obligation Bond referendum was approved (\$72,000,000) for transportation projects and are included. This is funded with a temporary sales tax.
17. A total of \$261,770 paygo capital sales tax remains reserved for the Senior Center until appropriated by City Council.
18. Beginning in FYE20 PSST capital outlay/project expenses and funding sources will be accounted for in the Capital Fund.

DETAILED PROJECT DESCRIPTION:

Currently there are many asphalt valley gutters in asphalt streets that have deteriorated due to the flow of stormwater. The deterioration is caused from the asphalt cracking, allowing stormwater to penetrate into the subgrade, causing the subgrade to destabilize. This project will replace deteriorated asphalt valley gutter with concrete valley gutters. City staff will identify proposed construction sites.

PROJECT TITLE: 12th Ave. SE and Triad Village - New Signal PROJ. CATEGORY: Traffic Signal - New DEPARTMENT: Public Works MANAGER: Michael D. Rayburn WARD(s): 1	PROJECT TYPE: Transp. w/ Fedl Fndg Improvt. PROJECT NUMBER: TR-0061 ACCOUNT NUMBER: 050-9076-431 BEGIN & END DATES: 6/1/04 to 12/1/20 LIFE EXPECTANCY: 20 Years
---	--

DETAILED PROJECT DESCRIPTION:

This intersection was recently evaluated as part of a Traffic Impact Assessment for the Bel-Aire Addition. The study concluded that the intersection of 12th Avenue SE and Triad Village Drive will need to be signalized with additional development in the area.

In order to provide adequate transportation facilities capable of accommodating the continued development of the area, the City and private developers will need to fund the design and construction of the new traffic signal. Private developers will be required to pay their proportional share of the total cost (17.49% of the cost of design and construction of the recommended improvements). The City of Norman will need to fund the rest based on the corresponding proportional share of the existing traffic, calculated at 82.51% of the local cost.

EXPENDITURE SCHEDULE through CITY Accounts by FY

OPERATING IMPACT: Negligible Genl Fnd \$5,000 per year for electricity and preventive maintenance

STATUS & COMMENTS:

The project is eligible for federal funds to pay for 80% of the construction cost.

The signalization of the intersection is needed in order to support additional development in the area. City Council has already approved preliminary plats requiring the new signal. Traffic impact fees are being collected from the various developers in the area. Monitoring development and traffic volumes.

Need to request federal funds from ODOT.

PROJECT TITLE:	ODOT Audit Adjustment	PROJECT TYPE:	Transp. w/ Fedl Fndg	Improvmt.
PROJ. CATEGORY:	Roadway	PROJECT NUMBER:	TR0068	
DEPARTMENT:	Public Works	ACCOUNT NUMBER:	050-9535-431	
MANAGER:	Scott Sturtz	BEGIN & END DATES:	1/1/09	to
WARD(s):	All	LIFE EXPECTANCY:		

DETAILED PROJECT DESCRIPTION:

In January 2009, Council adopted a new policy involving the creation of a project account called the ODOT Audit Adjustment Account with \$100,000 dedicated to payment of ODOT final invoices. The intent of the policy was to replenish the account each budget year up to the balance of \$100,000. Establishing this account, creates a process for all pending project accounts to be closed and the remaining project funds transferred back to the Capital Fund balance to be available for other projects. Since ODOT's final audit process takes three to seven years to complete, it was felt this process would free up the unencumbered project funds more quickly.

PROJECT TITLE: Bridge Maintenance Program PROJ. CATEGORY: Bridge Maintenance Program DEPARTMENT: Public Works MANAGER: Paul D'Adrea WARD(s): All	PROJECT TYPE: Transp Cty Fnd Only Maint. PROJECT NUMBER: TC0254 ACCOUNT NUMBER: 050-9687-431 BEGIN & END DATES: 7/1/14 to 7/1/23 LIFE EXPECTANCY: 20 yrs.
--	--

DETAILED PROJECT DESCRIPTION:

The City of Norman is responsible for the maintenance of 73 bridges. Every two years the bridges are inspected by a registered professional engineer approved by the Oklahoma Department of Transportation (ODOT) to inspect bridges in the State. The inspection report for all 73 bridges identifies elements of each bridge that needs maintenance. Some of the maintenance can be performed by the Street Division; however, some of it cannot. This capital project provides funding for the maintenance work that cannot be performed by the Street Division. If a bridge is allowed to deteriorate due to the lack of maintenance, it can become unsafe and, as a result, become a liability to the City of Norman and its residents. If it reaches a certain point of dis-repair, ODOT would require that the bridge be closed immediately.

STATUS & COMMENTS:

This budget item reflects a portion of the extent of necessary drainage/transportation infrastructure maintenance to ensure a safe transportation system and to defer structural replacement. However, two bridges beyond their useful life are on the horizon for replacement including Franklin Road Bridge located 0.1 mile west of 36th Avenue NE and East Robinson Street Bridge located 0.6 mile east of 72nd Avenue NE. Studies need to be completed on these bridges in FYE19 to determine H&H requirements and estimated costs so construction funding sources can be identified.

PROJECT TITLE: Downtown Sidewalks and Curbs PROJ. CATEGORY: General Maintenance DEPARTMENT: Public Works MANAGER: Jack Burdett WARD(s): 4	PROJECT TYPE: Transp Cty Fnd Only Maint. PROJECT NUMBER: TC0xxx ACCOUNT NUMBER: 050-9716-431 BEGIN & END DATES: 7/1/18 to 8/30/19 LIFE EXPECTANCY: 20 years
---	--

DETAILED PROJECT DESCRIPTION:

This project repairs the deteriorated sidewalks and curbs in the downtown area. The particular sites to be repaired will be chosen by City staff and will be based on a recommendation from the Downtown Merchants Association. This fiscal year this program will focus on Crawford Ave. North and South of Main Street improving accessibility and ADA Compliance.

PROJECT TITLE: Driveway Repair Program PROJ. CATEGORY: General Maintenance DEPARTMENT: Public Works MANAGER: Jack Burdett WARD(s): 4 7 8	PROJECT TYPE: Street Maintenance Maint. PROJECT NUMBER: SC0xxx ACCOUNT NUMBER: 050-9370-431 BEGIN & END DATES: 7/1/18 to 8/30/19 LIFE EXPECTANCY: 50 years
--	---

DETAILED PROJECT DESCRIPTION:

This project repairs hazardous or deteriorated driveways in the Central Core Area. Specific locations will be chosen based on criteria established by Council. All inquiries regarding replacement driveways will be directed to the City Engineer (or designee).

The following material is the selection criterion that staff will look at to determine which driveways will qualify initially and when funding is limited.

1. Core Area (mandatory)
2. Requested by the property owner of a platted residential use lot (mandatory)
3. The property owner must pave the portion of the driveway that is on private property at his or her expense (mandatory)
4. Drive is for established residential lot with structure(s). No new homes or subsequent to structure demolition (mandatory).
5. Condition of existing Driveway
6. Extent of pavement on existing driveway
7. Percent of Driveways in block that are paved.
8. Does the street have curb and gutter or borrow ditches

---	--

DETAILED PROJECT DESCRIPTION:

The City of Norman Engineering Design Criteria Manual and the Standard Specifications and Construction Drawings Manual were last updated in July 2006. These manuals are critical to ensure that City projects are designed and constructed to industry standards. The various sections and drawings have become outdated over the years so it is time for a major overhaul of these documents.

PROJECT TITLE:	GIS Mapping Update	PROJECT TYPE:	Bldgs & Gnds	Maint.
PROJ. CATEGORY:	Geographic Information System	PROJECT NUMBER:	BG0074	
DEPARTMENT:	Planning / GIS	ACCOUNT NUMBER:	050-9533-419	
MANAGER:	Joyce Green	BEGIN & END DATES:	2/15/19	to 12/31/19
WARD(s):	All	LIFE EXPECTANCY:	2 yr primary usage, permanent archive	

DETAILED PROJECT DESCRIPTION:

This project will update the City's base map to reflect new construction and any other changes on the ground, which have occurred since the last base map update was completed in 2017. The project will start in winter 2019 when leaf-off aerial photography will be collected. This project is standard maintenance of the GIS database. The deliverable products will be color aerial photography and an update of the planimetric (structures, paving, etc.) base map of entire city. This information is used for many purposes throughout the city including: permitting, stormwater planning (particularly related to impervious surface), utility management, and public safety. Almost every development project, both public and private, starts with a map. The availability of recent, accurate, and complete mapping facilitates the effective management of the City's resources. Archived photos are regularly used for zoning and code compliance cases. The City may be able to coordinate this project with other ACOG agencies to reduce costs. It has two distinct components: aerial photography, which is budgeted at \$45,000; planimetric mapping and optional LiDAR, which is budgeted at \$100,000. The amount budgeted should allow the City of Norman to choose a data vendor from first tier contractors and add any computing capacity required to serve the data over the computer network.

DETAILED PROJECT DESCRIPTION:

These funds are provided primarily for acquisition of property or conservation easements for parcels to become part of the Norman Greenbelt System. Thus far, funds have been directed towards matching funds for grants that have included both purchase of conservation easements, for trail projects, and for purchase of structures/properties in the floodplain. Funding was also provided as part of the Storm Water Master Plan project to develop a Greenway Master Plan. Future funds are anticipated to be used to implement the Greenway Master Plan and to acquire environmentally sensitive properties in the City.

PROJECT TITLE: Municipal Complex Renovation (2008 G.O. Bond) PROJ. CATEGORY: DEPARTMENT: City Manager MANAGER: Terry Floyd WARD(s): 4	PROJECT TYPE: Bldgs & Gnds Improvt. PROJECT NUMBER: ACCOUNT NUMBER: 050-9644.419 BEGIN & END DATES: Feb. 2019 to 6/1/24 LIFE EXPECTANCY: 50 years
---	--

DETAILED PROJECT DESCRIPTION:

This project will be for the renovation of the City Municipal Complex Buildings A, B, C and Annex (City Hall) as authorized in the 2008 General Obligation Bond (G.O.) approved by Norman residents. This project will include renovation of the existing buildings, additional parking and other complex renovations. These renovations are projected to be in line with those developed in the original bond proposal 2008 Municipal Complex Master Plan Study and updated in the September 2015 Master Plan Update. Funding for this project will be provided upon sale of the 2008 G.O. bonds.

--------	----------	--

STATUS & COMMENTS:

This project will likely begin design in February 2019 (FYE 2019) and will initially utilize funds from 050-9644.419, with funds currently designated for the Municipal Complex Signage project. Once the 2008 G.O. bonds are issued for this project and final determinations are made for the entirety of the issuance due to ongoing Senior Center discussions, any funding utilized from the Municipal Complex Signage project for this project will be reimbursed to the project account. The project will likely take place over multiple fiscal years and will need to have funding carried over those years. Construction could begin in late FYE 2020. Bond issue cost is estimated to be \$172,000.

CITY OF NORMAN

PROJECT TITLE:	Security System Replacement	PROJECT TYPE:	Bldgs & Gnds	Improv.
PROJ. CATEGORY:	Buildings and Grounds	PROJECT NUMBER:	BG0069	
DEPARTMENT:	Information Technology	ACCOUNT NUMBER:	050-9365-419 61-01	
MANAGER:	Kari Madden	BEGIN & END DATES:	7/1/17	to 6/30/21
WARD(s):	All	LIFE EXPECTANCY:	15 to 20 years	

DETAILED PROJECT DESCRIPTION:

This request is needed to replace the failing access control system (Win-Pak) in Building A, PD, PD SID, PD Range, and Water Treatment. We are currently on Win-Pak SE 2.0, which we no longer have maintenance on as support ended in 2011. We are experiencing challenges with door resets and the software often crashes and has to be reset to gain control of the doors it manages in Building A, PD, etc. All access to these buildings has to be maintained in both our access control systems which is very labor intensive for IT staff. The door readers in the Win-Pak system are getting old and costly repairs are getting more frequent. This request would first bring in the five buildings remaining on the Win-Pak system (Building A, Building B, Police SID, Water Treatment, Police Range) and only replace what is existing, once failing equipment has been replaced we will use any extra funds to build in camera's or security components to the facilities listed. Our core focus is getting this failing system out, if it fails the buildings will have to operate with manual keys and locks and no reporting capabilities. They will have to be manually locked and unlocked each morning and during business hours.

Municipal Court's camera system is in need of repair, this request would replace those camera's and add additional to cover the court room, clerks area for money handling and citizen interaction, safe. We will also attempt to put automatic door closures on doors that do not secure properly to the outside and have been found open after hours. The Genetec system could notify if a door does not lock after hours once we bring the door into the system.

Fleet's camera's are also in a failing state and recommended to address in the FYE18 as you will see below. These cameras monitor the fuel islands and Fleet parking lot areas. This does not include camera's for all the buildings at North Base that would be expanded in subsequent years.

All of these request will require additional storage for the video which was not calculated within the original requests. We allocated \$20,000 for storage expansion and \$30,000 to automate and log the gate at Street Maintenance which has numerous cell carriers accessing at will with no tracking the facility. It would be helpful to see access logging and times to the facility with all of the heavy equipment, materials, and chemical that is stored there. Not to mention the city has a secondary data center in a cell hut at this facility as well.

We have the new Genetec system in place at Police NIC, Building C, City Hall, and Fleet. Genetec is the City's new access control system as well the system that maintains electronic gates, camera systems, ID badge making, alarm notifications, etc. going forward. The system is fast, easy to use, and contains a variety of customizable reports. Genetec also runs our video surveillance system, which is distributed throughout the city. I.T. has two Genetec certified employees.

Subsequent years would address the additional projects requesting to have access control, camera's, or gate access brought into the Genetec system based on priority by Management. We will replace other camera's at Streets and other facilities in future years.

EXPENDITURE SCHEDULE through CITY Accounts by FY

Account Number	Cost Element	TOTAL ALL FISCAL YRS	Actual Prior Years	Budget FYE 2019	FYE 2020	FYE 2021	FYE 2022	FYE 2023	FYE 2024	Beyond 5 Years

Street Maintenance	Improv't.		

DETAILED PROJECT DESCRIPTION:

Construction of salt storage and loading facility at the North Base Facility on Da Vinci Street. The Street Division currently has one location for salt storage and loading of trucks at the Lindsey Street Yard Facility. Due to the expanding scope of snow/ice control operations, it has become necessary for a second location to have salt storage and loading that has the ability to service the northern half of Norman. This facility will enable the Street Division crews to reduce the amount of time traveling to the Lindsey Yard location in southern Norman and give a more timely response to conditions in the expanding areas to the north.

MANAGER:	Mitch Miles	BEGIN & END DATES:	7/1/18	to 6/29/23
WARD(s):	All	LIFE EXPECTANCY:	25 Years	

DETAILED PROJECT DESCRIPTION:

This project is for the upgrade and replacement of old and high-maintenance park amenities. Items such as old picnic tables and benches will be replaced. Concrete pads will be installed under new and existing amenities to protect them from mower damage and to provide an all-weather surface for the user. Also included could be such items as deteriorated or damaged grills, trash cans, drinking fountains, landscaping, bike racks, sports equipment, etc. The project will also be used to make improvements to the public landscape areas in the City, such as traffic islands/medians, landscapes at public buildings and downtown landscape areas, which all are subject to mechanical and environmental damage throughout the year and are often in need of minor replacements. Any major landscape renovations at these sites will be requested as a stand-alone project and funded accordingly.

OPERATING IMPACT:

negligible Genl Fnd

STATUS & COMMENTS:

We are requesting a \$8,000 per year increase beginning in FYE2020 to account for the expenses we have encountered over the past several years associated with replacement of landscape materials in parks and traffic islands throughout the city. We do not have a dedicated "Beautification" budget in the annual project list like we used to in the early 2000's. Recent requests to create such a project have not been approved in the budget cycles; therefore we propose including this function into the "site amenities" project as a logical way to accommodate these recurring costs.

CITY OF NORMAN

PROJECT TITLE:	Drainage Miscellaneous Annual Projects	PROJECT TYPE:	Stormwater Drainage	Maint.
PROJ. CATEGORY:	General Maintenance	PROJECT NUMBER:	DR0019	
DEPARTMENT:	Public Works	ACCOUNT NUMBER:	050-9967-431	
MANAGER:	Carrie Evenson	BEGIN & END DATES:	7/1/15	to Annual
WARD(s):	All	LIFE EXPECTANCY:	20 years	

DETAILED PROJECT DESCRIPTION:

Every year, several small (\$2,000 - \$10,000) unplanned drainage projects, which are typically reported to staff via citizen requests, are not constructed because they have not been funded. This program funds these small drainage projects. These projects include repairing concrete flumes between houses, damaged or improperly sized storm sewer inlets and installation of new storm sewer inlets. This project will provide staff with the necessary funding to construct these small drainage projects. In so doing, it will produce a very positive citizen impact.

OPERATING IMPACT:

positive

Genl Fnd

While maintenance of infrastructure is required, generally these small drainage projects will result in a decreased in overall City of Norman effort and budget expenditure due to updating, upgrading, and increased level of service and reduction in necessary response to customer complaints.

CITY OF NORMAN

PROJECT TITLE:	Lake Thunderbird Watershed TMDL Compliance	PROJECT TYPE:	Stormwater Drainage	Improv.
PROJ. CATEGORY:	Stormwater Drainage	PROJECT NUMBER:	DR0061	
DEPARTMENT:	Public Works	ACCOUNT NUMBER:	050-9968-431	
MANAGER:	Carrie Evenson	BEGIN & END DATES:	7/1/14	to Annual
WARD(s):	All	LIFE EXPECTANCY:		

DETAILED PROJECT DESCRIPTION:

On November 5, 2015, the City submitted Compliance and Monitoring Plans (Plans) to the Oklahoma Department of Environmental Quality (ODEQ) for their review. ODEQ approved the City's Plans on September 21, 2016, and the Council adopted the approved Plans on October 25, 2016, through Council Resolution R-1617-41. This was the culmination of a contract entered into by the City with Olsson Associates to develop a plan to bring the City's stormwater discharges into compliance with the Waste Load Allocations developed from the Lake Thunderbird TMDL. The City will begin the first 5 year cycle by implementing a Monitoring Plan to establish a baseline for flow and pollutant loading of streams flowing from or through the City to Lake Thunderbird. Pollutants to be monitored are nitrogen, phosphorus, and total suspended solids. BMPs will also be implemented as part of the City's Compliance Plan beginning with education campaigns and enhancing programs already in place, progressing to increasing cleaning efforts. These efforts during the first 5 years are aimed at reducing pollutants in stormwater runoff at the source. The Plans and the results of the monitoring will be reviewed at the end of this initial 5 year cycle to determine where best to establish structural BMPs during the next 5 year cycle. The budgets developed for FYE 2016 and onward are for implementation of the Monitoring Plan.

OPERATING IMPACT:

positive

Genl Fnd

This project should have a positive impact on operations. As water quality entering Lake Thunderbird improves, drinking water quality will improve.

STATUS & COMMENTS:

Contract No. K-1516-79 was established between the City and the Oklahoma Water Resources Board on January 26, 2016. Monitoring began in March 2016 and is ongoing.

PROJECT TITLE: Traffic Management Center Study PROJ. CATEGORY: Traffic Control Maintenance DEPARTMENT: Public Works MANAGER: Angelo Lombardo WARD(s): All	PROJECT TYPE: Transp Cty Fnd Only Maint. PROJECT NUMBER: TC ACCOUNT NUMBER: 50 BEGIN & END DATES: 7/1/18 to 12/30/26 LIFE EXPECTANCY: 20 years
--	---

DETAILED PROJECT DESCRIPTION:

This study provides the Systems Engineering Analysis required by the Federal Highway Administration that is necessary for federal funding eligibility with the establishment of the City's Traffic Management Center (TMC).

The City's new Emergency Operations Center will include space for the new TMC. There are however no funds earmarked to equip the TMC. Completion of the study will allow the City to apply for more than \$3,000,000 in federal funds to buy the equipment needed in the TMC (i.e., computers, software, furniture, etc.).

The study will also assess current and future staffing needs for the Traffic Control Division.

CAPITAL IMPROVEMENTS PLAN

NORMAN FORWARD SALES TAX FUND - 51

ASSUMPTIONS

1. NORMAN FORWARD is a quality of life initiative proposed by community groups and residents. On October 13, 2015 voters authorized a ½ cent temporary (15 years) sales tax to fund the projects. Collection began January 1, 2016. Some of the projects will be funded on a pay as you go basis. Some of the projects are of higher importance and greater costs, and therefore require borrowing funds through general obligation bonds.
2. In FYE20, \$21,892,860 is scheduled for six bond funded projects and \$6,100,000 for five paygo funded projects. The individual projects' impacts on the operating budget may be significant because they are new and expanded facilities.

CITY OF NORMAN

PROJECT TITLE: Andrews Park Improvements PROJ. CATEGORY: Parks & Recreation DEPARTMENT: Parks & Recreation MANAGER: James Briggs WARD(s): 4	PROJECT TYPE: Parks & Recreation Improvt. PROJECT NUMBER: NFB019 ACCOUNT NUMBER: 051-9050-452 BEGIN & END DATES: 7/1/17 to 6/30/19 LIFE EXPECTANCY: 50 Years
--	--

DETAILED PROJECT DESCRIPTION:

This project is for the construction of several improvements in Andrews Park--Norman's oldest park, which was dedicated on the original town plat for the city, when it was established in 1890. Over the years, this downtown park has been home to a baseball stadium, zoo, horse stables, play areas, WPA-Era pool, amphitheater, and stream channel projects, and, more recently, tennis and basketball courts and a street-course skate park. The current layout allows this park to be used daily for sports practice, childrens play, summer splash pad, walking and skatepark activities. It is also host to multiple community-wide concerts and festivals throughout the year. The major parts of this project will include construction of a new concrete "drop-in" skatepark to replace the existing "street course" currently in the northeast corner of the park. The existing features will be re-located to other parks around town to create several "skate spots" in various parks. We also plan to add more extensive shade over the seating areas at the amphitheater and to make additions to the splashpad, including updating the spray features and adding more seating, lounging areas/family gathering areas and shade around that popular park feature.

------------	----------	---

STATUS & COMMENTS:

The old Blake Baldwin Skatepark was removed in FYE2018 to make way for the re-alignment of James Garner Avenue. Those features were re-constructed as three smaller Skate Spots in Oak Tree South, Colonial Commons and Adkin's Crossing Parks. We are working to hire a skatepark construction company in early 2019 and proceed with citizen input, design and construction this calendar year. Other projects are also being bid to make the shade improvements at the amphitheatre and other park improvements listed above.

PROJ. CATEGORY:	Parks & Recreation	PROJECT NUMBER:	NFB	
DEPARTMENT:	Parks & Recreation	ACCOUNT NUMBER:	051-	
MANAGER:	James Briggs	BEGIN & END DATES:	7/1/24	to 6/30/25
WARD(s):	3	LIFE EXPECTANCY:	70 Years	

DETAILED PROJECT DESCRIPTION:

This project is for the development of a new Canadian River Park in Norman. The land proposed for this park is south and west of the Lindsey Street Extension (from Interstate Drive around to 36th Avenue SW). The park development can only proceed as planned for the budget indicated if the land is gifted to the City, as has been discussed. A land purchase is not included in the project budget shown here.

CITY OF NORMAN

PROJECT TITLE: Griffin Park Remodel PROJ. CATEGORY: Parks & Recreation DEPARTMENT: Parks & Recreation MANAGER: Matt Hendren WARD(s): 8	PROJECT TYPE: Parks & Recreation Improvt. PROJECT NUMBER: NFB0001 ACCOUNT NUMBER: 051-9639-452 BEGIN & END DATES: 7/1/16 to 6/30/20 LIFE EXPECTANCY: 50 Years
--	--

DETAILED PROJECT DESCRIPTION:

This project is for the re-development of Griffin Park as a Soccer Complex. The majority of the design and construction work will be focused on re-use of those parts of the park that are currently being used for the City of Norman's Youth Baseball and Softball leagues, which are being relocated to Reaves Park via a separate project, to allow new soccer fields to be built in their place (including new lighting, irrigation, site furnishings, parking areas and park roads). The existing soccer fields will remain in-service while Reaves is re-done and a new Community Sports Park is being developed for the adult softball league and the youth football and adult flag football leagues. Once the new soccer fields are constructed, Griffin Park will be able to host large regional tournaments throughout the year. The park remodel will not include construction of any new soccer facilities north of the irrigation lake in the dog park/disc golf area; but it does include continued improvements to the park trails (including a walk bridge over part of the lake), the dog park and the disc golf course area.

EXPENDITURE SCHEDULE through CITY Accounts by FY

OPERATING IMPACT:

moderate Rm Tx Fnd More Revenue can be expected in Room Tax from more tournaments

STATUS & COMMENTS:

Two projects have been completed in the first two years of Norman Forward funding to re-grade the large competition fields in the northwest part of the complex. These improvements have greatly increased the playability and look of the facility for tournament and league play. A project is on-going in FYE 2019 to proceed with the work involved with completing the conversion of the old football practice fields in the southwest part of the complex to lighted soccer fields and to construct a new restroom and concession building for that area. Work will ramp-up as the Reaves Park projects commences construction, and the youth baseball fields at Griffin are replaced with the new facilities at Reaves -which will make room for the final phase of the Griffin Park remodel.

PROJECT TITLE: Indoor Aquatic Facility PROJ. CATEGORY: Parks & Recreation DEPARTMENT: Parks & Recreation MANAGER: Jason Olsen WARD(s): 8	PROJECT TYPE: Parks & Recreation Improvt. PROJECT NUMBER: NFB002 ACCOUNT NUMBER: 051-9546-452 BEGIN & END DATES: 7/1/16 to 6/30/19 LIFE EXPECTANCY: 50 Years
--	---

DETAILED PROJECT DESCRIPTION:

This project is for the construction of a new indoor Aquatics Center. The original plan called for this new facility to be built near the existing YMCA, and then be operated and programmed as a joint venture between the City of Norman, the Norman Public Schools and the Cleveland County YMCA; and to be constructed as part of a multi-facility improvement on the land being purchased from the University of Oklahoma east of the YMCA, along with the new Indoor Sports Facility, and a possible new Senior Citizens Center, which are planned to be built via separate projects in the NORMAN FORWARD package. This Aquatics Center will include competition swimming facilities, therapeutic water areas, and recreational swimming. The project will include the building and part of the associated parking and landscape/site improvements which would serve this building.

PROJECT TITLE: Reaves Park Remodel PROJ. CATEGORY: Parks & Recreation DEPARTMENT: Parks & Recreation MANAGER: James Briggs WARD(s): 7	PROJECT TYPE: Parks & Recreation Improvt. PROJECT NUMBER: NFB006 ACCOUNT NUMBER: 051-9205-452 BEGIN & END DATES: 7/1/17 to 6/30/19 LIFE EXPECTANCY: 50 Years
---	---

DETAILED PROJECT DESCRIPTION:

This project is for the re-design and development of Reaves Park as a youth baseball facility. Work will include re-location of the current Park Maintenance facilities to another location, as well as the current adult softball fields (to the new Community Sports Park site to be purchased and developed via a separate project). Once these facilities are removed from Reaves, all of the Youth Baseball and Softball fields will be relocated to Reaves from Griffin Park and combined with the Optimist Youth Baseball Fields already in Reaves to make one complete baseball/softball park for all ages from T-Ball up through teenage leagues. The design and development of these facilities will not alter the southwest sector of the park, which is the site of the Cleveland County Veteran's Memorial, the Kidspace Playground Facility and the home to the annual Medieval Fair, as well as Norman Day, Earth Day and other community-wide festivals. All utilities, park roads, buildings, landscape features, parking areas and site furnishings will be evaluated and upgraded, as needed as part of this project; with particular attention paid to the ingress/egress points of the park and how they relate to the current road capacity during peak use times.

STATUS & COMMENTS:

The design team from Halff Associates (hired in FYE2018) is working to produce the Construction Documents for the project; and we are seeking the services of a Construction Manager at Risk during FYE2019. Work will proceed as soon as possible; but will be contingent on the construction of a new Park Maintenance Facility at North Base (funded as part of this project), so that the current facility in Reaves Park can be demolished to make room for a major part of the new ballfield construction in its place. We are also awaiting the finalization of the land deal and design of the new community sports park NORMAN FORWARD project, which will provide a new home for the adult softball fields. The initial phase of Reaves Park construction will include removing 3 of the 6 current adult fields to make way for one of the new youth field complexes in the northwest part of Reaves; however, the other 3 fields must relocate as soon as possible in order for the full build-out of Phase I of this project to be constructed.

PROJECT TITLE:	Neighborhood Park Improvements	PROJECT TYPE:	Parks & Recreation	Improv.
PROJ. CATEGORY:	Parks & Recreation	PROJECT NUMBER:	NFP101	
DEPARTMENT:	Parks & Recreation	ACCOUNT NUMBER:	051-9830-452	
MANAGER:	Mitch Miles	BEGIN & END DATES:	7/1/16	to 6/30/26
WARD(s):	All	LIFE EXPECTANCY:	30 Years	

DETAILED PROJECT DESCRIPTION:

This project is designated to make improvements to all the neighborhood parks in the City of Norman. The level of improvement needed at each park varies from site to site; however, there is work to do at each park. Staff will prioritize and execute a plan for each park, in a way that maximizes our bidding prices each year to get the best value for similar improvement that may occur in the various parks. We will use the 2009 Parks and Recreation Master Plan as a guiding document for these improvements with input from the neighborhoods served by each each park site

OPERATING IMPACT:

slight Genl Fnd ongoing maintenance, utilities, computer services

STATUS & COMMENTS:

The first parks to be renovated were Oakhurst, Sonoma Park and Prairie Creek Park. While these all received complete renovations, we also made improvements to the playground safety surfacing, park furnishings and practice sports facilities at parks throughout the city each fiscal year. These are Pay-Go projects that only allow us to do projects as funds are collected into the account; however we utilize Park Land Development Funds (Fund 52) at each site as needed to maximize our major renovations at each park. The next parks scheduled for renovation in FYE2020 include Rotary, Earl Sneed and High Meadows Parks, with continued small projects at other parks to improve the park shelters, landscapes and amenities as-allowed by the annual funding.

MANAGER:	James Briggs	BEGIN & END DATES:	7/1/17	to 6/30/21
WARD(s):	All	LIFE EXPECTANCY:	50 Years	

DETAILED PROJECT DESCRIPTION:

This project is for the development of new neighborhood parks in several developing areas of town. The city has been acquiring these properties as the neighborhoods develop, as required by the Park Land Dedication Ordinance. Utilizing the Norman Forward funding, we will be able to supplement Park Development Fees in order to build new parks similar to the one built in 2014 at Monroe Park. Specifically, these funds will be used to help build new neighborhood parks in the Cedar Lane, Southlake/St. James, Summit Valley/Bellatona, Redlands and Links additions.

CITY OF NORMAN

PROJECT TITLE: New Trail Development Throughout Town PROJ. CATEGORY: Parks & Recreation DEPARTMENT: Parks & Recreation MANAGER: Mitch Miles WARD(s): All	PROJECT TYPE: Parks & Recreation Improvt. PROJECT NUMBER: NFP ACCOUNT NUMBER: 051- BEGIN & END DATES: 7/1/19 to 6/30/22 LIFE EXPECTANCY: 50 Years
--	--

DETAILED PROJECT DESCRIPTION:

This project is for the construction of several sections of the Legacy Trail multi-modal path in the central and north parts of town. In particular, we plan to design and build the trail section that will connect from Ruby Grant Park to the east--across Interstate-35 and then along the Little River corridor across Flood Street and over to the Stubbeman Avenue area, where it will link back up to the existing Robinson Street trail section. This loop will include several neighborhood trail connections, which are being built by those currently developing the Little River Trails, Trailwoods and Greenleaf Trails housing additions. Those trail sections were included in the final plats of those neighborhoods in anticipation of the connection to a city-wide trail in the future.

We will also use this project to construct a segment of the Legacy Trail system along the west side of Flood Street, north of Robinson street up to Tecumseh Road, in order to provide a safer off-street multi-modal path for pedestrians and bicyclists in this part of town.

OPERATING IMPACT: slight Genl Fnd ongoing maintenance, utilities, computer services

STATUS & COMMENTS:

FYE2020 funds will be partially utilized to fund the conversion of the remaining asphalt sections of the trail on the north side of Robinson Street (from Flood Street west to 24th Avenue NW) to concrete. That work will be done as part of the water line replacement project in this area by the Utilities Division of the City. They will make the upgrade of the trail from asphalt to concrete part of their bid package for the project, and cost-share the difference in the construction cost between asphalt and concrete with the Parks and Recreation Department, as a way for the city to get the best pricing for the work to benefit both projects. Also, the Public Works Department is applying for funds to construct the multi-modal path on the west side of north Flood Street (Highway 77) from Robinson Street to Tecumseh Road; as well as the connection from Flood to 24th Avenue along Tecumseh Road. This work by Public Works will fulfill that part of the NORMAN FORWARD trails project budget that was planned for that route, and allow those funds to be used to help cover the cost to re-construct the Robinson Street path in concrete, instead of replacing it with asphalt, during the Utilities Division's water line replacement project.

PROJECT TITLE: Ruby Grant Park Development PROJ. CATEGORY: Parks & Recreation DEPARTMENT: Parks & Recreation MANAGER: Jud Foster WARD(s): 8	PROJECT TYPE: Parks & Recreation Improvt. PROJECT NUMBER: NFB105 ACCOUNT NUMBER: 051-9322-452 BEGIN & END DATES: 7/1/16 to 6/30/20 LIFE EXPECTANCY: 50 Years
---	---

DETAILED PROJECT DESCRIPTION:

This project is for the initial development of the Ruby Grant Community Park site--a 157-acre park located at I-35 and Franklin Road. The City acquired this land in the early 2000's, and developed a Master Plan based on extensive community input shortly after its purchase. Now a part of the Norman Forward package, we have proceeded with hiring a firm to produce construction drawings which we will use to acquire construction bids for the first set of improvements at the park. Included in this would be the construction of the major infrastructure components for the park (utilities, roads, parking) as well as initial walking and running trails, practice sports areas, an inclusive children's play area, a disc golf course, a dog park, pedestrian lighting and improved park signage and fencing

STATUS & COMMENTS:

Construction Documents are being finalized during FYE2019; and the City is proceeding with hiring a Construction Manager at Risk for the project and bidding the initial construction of the park at this time. Extensive public input was sought for the inclusive playground at Ruby Grant; and a community fund-raising effort is being led by the playground vendor to maximize the design and construction of this first-of-its-kind feature for Norman Parks and Recreation.

WARD(s):	5	LIFE EXPECTANCY:	50 Years	

DETAILED PROJECT DESCRIPTION:

This project is for the continued development of John Saxon Jr. Memorial Community Park in Southeast Norman. Over the past 5 years, the City was able to secure 80% funding for the initial development of parking and trail facilities (cross-country and fitness/walking trails) from the state of Oklahoma Recreational Trails Grant program. The remaining projects at the park include construction of children's play areas, restroom facilities, completion of the park road to connect to John Saxon Boulevard west of the park, construction of a recreation/irrigation lake, tournament and picnic pavilions, improved perimeter fencing, and other site amenities as shown on the park's Master Plan.

Park Land And Development Fund

CAPITAL IMPROVEMENTS PLAN

PARK LAND AND DEVELOPMENT FUND - 52

ASSUMPTIONS

3. Beginning November 1, 1994, the City of Norman began collecting fees with every new residential construction permit. Revenues are earmarked for capital improvements to neighborhood and community parks. The total fee per dwelling unit includes a \$75 community park fee and a \$75 neighborhood park fee. Exceptions to the neighborhood fee are made for residences served by private neighborhood parks or on rural land not within 1 mile of an existing neighborhood park.
4. The funds specifically designated for community public parks improvements can only be spent in Griffin Community Park, Reaves Community Park, Andrews Community Park, Sutton Urban Wilderness Area, John Saxon Park and Ruby Grant Park.
5. The funds specifically designated for neighborhood parks, paid with the building permit for any new dwelling, may be spent to improve the neighborhood public park serving that dwelling, or a nearby park.
6. Neighborhood park improvements will be scheduled when the Parks Board and City Council determine that there have been sufficient residential units constructed to warrant a capital project and sufficient fees have been collected to construct the project. This information changes daily and is maintained by the Parks Department.
7. No new project funding is proposed in FYE20.

CAPITAL IMPROVEMENTS PLAN

UNIVERSITY NORTH PARK TIF FUND - 57

ASSUMPTIONS

1. As authorized in the Oklahoma Constitution, Article 10, Section 6C and in the Local Development Act, 62 O.S. §850 et seq., and in order to facilitate development and improvements in the University North Park District, the University North Park Tax Increment Finance District was created.
2. Projects were identified and approved by City Council in accordance with the provisions of the Local Development Act.
3. The Tax Increment Finance District was created to facilitate development and improvements in an area where such improvement would not have otherwise occurred.
8. The University North Park Area includes land adjacent to 24th Avenue NW, between Robinson Street and Tecumseh Road.
9. New funds to continue one project is proposed in FYE20 at \$1,100,000.

STATUS & COMMENTS:

On May 23, 2006, the City Council adopted Ordinance O-0506-66, establishing a Project Plan for the University North Park Tax Increment Finance District (UNP TIF). Among the public improvements to be paid for from the sales tax and property tax revenues apportioned to the UNP TIF Fund were Traffic and Roadway Improvements to support the UNP development.

**Arterial Road
Recoupment Fund**

CAPITAL IMPROVEMENTS PLAN

ARTERIAL ROAD RECOUPMENT FUND - 78

ASSUMPTIONS

1. In FYE97, Council set aside public **Funds** for construction of **Arterial Roads** in advance of private development and **Recoup** the developers' required contributions later. The intent is to avoid dangerous driving conditions due to varied pavement widths. Varied pavement widths (gap paving) result when non-contiguous segments of road are widened according to the different schedules of individual private land development adjacent to the same arterial road. The ARR Fund allows the City of Norman to finance widening of arterials in longer segments at the same time, and recoup the developer's contributions later (right-of-way and construction costs).
2. Per Ordinance O-9697-31, property owners shall repay the City either before development or at the time of land development for all local arterial street construction costs, which they would normally incur under development regulations.
3. Capital Sales Tax revenues, totaling \$2,947,732, were transferred from the Capital Fund (Fund 50) to this fund to create the initial funding, with the intent that future revenues would be received as land would be developed, and thereby there would be a revolving funding source to continue the program. The Capital Fund was repaid \$173,280 in FYE02 and \$27,200 in FYE07.
4. There is no new funding for projects in FYE20.

GLOSSARY OF TERMS and ACRONYMS

ACOG – Association of Central Oklahoma Governments.

ADA – American Disabilities Act

AERATION – The addition of air or oxygen to water or wastewater, usually by mechanical means, increases dissolved oxygen levels and maintains aerobic conditions.

ARR – Arterial Road Recoupment.

ASSETS – Resources owned or held by the City, which have monetary value.

BASIN - An area defined by the network of sewer line segments that are tributary to and terminate at a designated and control point.

BIOSOLIDS – Solid organic matter recovered from municipal wastewater treatment that can be beneficially used, especially as a fertilizer. Biosolids are solids that have been stabilized within the treatment process, whereas sludge has not.

BOND - A written promise to pay a sum of money on a specific date and at a specified interest rate. The interest payments and the repayments of the principal are detailed in a bond ordinance. The most common types of bonds are general obligation (GO) and revenue (Water/Sewer) bonds. These are most frequently used for construction of large capital projects, such as buildings and streets.

BUDGET - A plan of financial operation embodying an estimate of proposed means of financing them. The term usually indicates a financial plan for a single fiscal year. The term “budget” is used in two senses in practice. Sometimes it designates the financial plan presented to the City Council for adoption and sometimes it designates the plan finally approved by the body. It is usually necessary to specify whether the budget under consideration is preliminary and tentative or whether the appropriating body has approved it.

BUDGETARY CONTROL - The control or management of the organization in accordance with an approved budget for the purpose of keeping expenditures within the limitations of available appropriations and available resources.

CAPITAL IMPROVEMENT CHARGE (CIC) – A charge placed upon all consumers and users for sewer or water service furnished by the City. The current CIC is \$1.00 per month for a residential customer. City code section 21-107(a)(1) requires the CIC amount to equal 60 percent of the actual monthly sewer charge for commercial and industrial customers. The CIC was implemented on March 24, 1970 as part of Ordinance 2156.

CIP – Capital Improvement Project or Capital Improvements Plan.

CAPITAL OUTLAY - Expenditures that result in the acquisition of or additions to fixed assets.

CAPITAL PROJECT FUNDS – An accounting fund type recommended by the Oklahoma Municipal Budget Act to account for financial resources segregated for the acquisition, construction or other improvement related to Capital Facilities other than those accounted for in Enterprise Funds and Trust Funds.

CLEANOUT - Outside access point on a property owner’s service lateral that allows for cleaning in the event of a blockage.

COLLECTION SYSTEM – In wastewater, a system of conduits, generally underground pipes, that receives and conveys sanitary wastewater and/or stormwater. In water supply, a system of conduits or canals used to capture a water supply and convey it to a common point.

COMCD – Central Oklahoma Master Conservancy District.

CONNECTION FEE – Previously known as the tap fee, was first developed in 1970. A charge for sewer or water connection based upon the size of the service line leading into and to be utilized for the furnishing of water or sewer to any use or structure. Monies received from the Connection charge are evenly divided between the City of Norman's Water and Wastewater funds. Collected fees are used to fund activities performed in both the water and sewer utility systems.

CORE AREA – The area bounded by Berry Road on the west, Robinson Street on the north, 12th Avenue on the east, and Constitution/Imhoff extended on the south.

COST ALLOCATION - Distribution of costs of centrally provided support services such as management, accounting, purchasing, payroll, information services and legal.

DEBT SERVICE - The City's obligation to pay the principal and interest of general obligation and revenue bonds according to a predetermined payment schedule.

DISINFECTION – The selective destruction of disease-causing microbes through the application of chemicals or energy.

DIVISION - A sub-section of a Department which carries out a specific line of work assigned to the Department.

EFFLUENT – Partially or completely treated water or wastewater flowing out of a basin or treatment plant.

EID – Environmental Information Document is the document which provides the basic information about a project and its environmental effects.

ENCUMBRANCE - A commitment related to unperformed contracts or goods or services. Encumbrances represent the estimated amount of expenditures ultimately to result if unperformed contracts in process are completed.

ENTERPRISE FUND - A fund established to account for operations that are financed and operated in a manner similar to private business enterprises, where the intent of the governing body is that the costs of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges.

EPA – Environmental Protection Agency.

EXCISE TAX - An excise tax is any tax that is not an ad valorem tax and is generally imposed on the performance of an act, engaging in an occupation, or enjoying a privilege. An ad valorem property tax is a tax imposed on the basis of the "value of the article or thing taxed." An ad valorem tax is usually imposed at recurring intervals on the same piece of property.

EXPENDITURES (EXPENSES) - Decrease in net total assets. Expenses represent the total cost of operations during a period regardless of the timing of related expenditures.

FACE VALUE (PAR, PRINCIPAL) – The full amount of an investment security, usually appearing on the face of the instrument.

FHWA – Federal Highway Administration.

FIDUCIARY FUNDS (TRUST & AGENCY FUNDS) – An accounting fund type recommended by the Oklahoma Municipal Budget Act to account for assets held by the municipality as trustee or agent for individuals, private organizations or other governmental units or purposes.

FISCAL YEAR (FY) - The time period designated by the City signifying the beginning and ending period for recording financial transactions. The City of Norman has a fiscal year of July 1 through June 30.

FIXED ASSETS - Long-lived tangible assets obtained or controlled as a result of past transactions, events or circumstances. Fixed assets include buildings, equipment and improvements other than building and land.

FUND - A fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions, or limitations.

FUND BALANCE - Fund Balance is the excess of assets over liabilities.

FUND BALANCE - RESERVED FOR DEBT SERVICE - A portion of fund balance that is legally restricted to the payment of long term debt principal and interest maturing in future years.

GENERAL FUND – An accounting fund type recommended by the Oklahoma Municipal Budget Act to account for all moneys received and disbursed for general governmental purposes.

GENERAL OBLIGATION BONDS (GO or GOB) - Legal debt instruments that finance a variety of public projects such as streets, buildings, and improvements. These bonds are backed by the full faith and credit of the issuing government and are financed through property tax revenues.

HEADWORKS – The initial structure and devices located at the receiving end of a water or wastewater treatment plant.

HVAC – Heating, ventilation and air conditioning.

IAV – Individually assessed vehicle.

IMPACT FEES – Set aside fees collected from developers causing infrastructure adjustments to the community. Monies to be used as the development further impacts the municipality.

I/I - An abbreviation for Infiltration and Inflow into the Sanitary Sewer System.

INFILTRATION - Groundwater that enters into the sanitary sewer through defects in the pipes and manholes such as cracks, separated joints, deteriorated manhole components, building foundation drains, and defective service laterals.

INFLOW - Surface stormwater that enters into the sanitary sewer through direct sources such as vented manhole covers, downspouts, area drains, and uncapped cleanouts.

INFLUENT – Water or wastewater flowing to a basin or treatment plant.

INTERCEPTOR - Sanitary sewer interceptors are those lines that convey sewage from neighborhood to neighborhood in route to the wastewater treatment plant. Pipe diameters are generally larger than lines placed within residential developments.

INTERCEPTOR SEWER - A sewer that receives flow from a number of other sewers or outlets for disposal or conveyance to a treatment plant.

INTERGOVERNMENTAL REVENUE - Grants, entitlements and cost reimbursements from another federal, state or local government.

INTERNAL SERVICE FUND - A fund used to account for the financing of goods or services provided by one department or agency to other departments of a government, on a cost- reimbursement basis.

ISSUER – A political subdivision (city, county, state, authority, etc.) that borrows money through the sale of bonds or notes. The Norman Utilities Authority and the Norman Municipal Authority are issuers of Revenue Bonds.

LAND APPLICATION – The disposal of wastewater or municipal solids onto land under controlled conditions.

LEVY - (Verb) To impose taxes, special assessments or service charges for the support of government activities. (Noun) The total amount of taxes, special assessments or service charges imposed by a government.

LIABILITIES - Debt or other legal obligations arising out of transactions in the past that must be liquidated, renewed, or refunded at some future date. This term does not include encumbrances.

LIFT STATION - A pumping facility that conveys wastewater flow, from an area that would not naturally drain to the wastewater treatment plant, into the gravity sewer system for delivery and treatment.

LINE ITEM BUDGET - A budget prepared along divisional line items focusing on what is to be bought.

MATURITY – The date the principal amount of an investment security becomes due and payable.

NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) – Program in the U.S. to issue, monitor, and enforce pretreatment requirements and discharge permits under the Clean Water Act.

NON-EXCESSIVE I/I - Measured inflow and infiltration within a sanitary sewer system that is considered more expensive to eliminate through rehabilitation than to transport and treat at the Municipality's wastewater treatment facilities.

ODEQ – Oklahoma Department of Environmental Quality.

OG&E – Oklahoma Gas and Electric Company.

ODOT – Oklahoma Department of Transportation.

OPERATING BUDGET - Plans of current expenditures and the proposed means of financing them. The annual operating budget is the primary means by which most of the financing acquisition, spending, and service delivery activities of the City are controlled. Municipalities are required by State Law to use annual operating budgets.

OSHA – Office of Safety and Health Administration.

OVERFLOW - A condition in which the wastewater flow rate in a sewer system exceeds the capacity of the sewer to the extent that raw wastewater is discharged directly to storm and drainage systems.

PAYBACK ORDINANCE – Ordinance (0-9697-30) allows the City Council to vote funds to pay costs of extending wastewater & water lines from an existing location to, along side or beyond the boundaries of a developer's new construction.

PAYGO – Cash basis of project funding, as opposed to incurring debt.

PEAK FLOW – Excessive flows experienced during hours of high demand; usually determined to be the highest 2-hour flow expected under any operational conditions.

PROPERTY TAX - Taxes levied on all real and personal property according to the property's valuation and the tax rate, in compliance with State Property Tax Code.

PUBLIC SECTOR - Those facilities operated and maintained by the Municipality.

REAL PROPERTY - Property classified by the State Property Tax Board including residential, single, and multi-family, vacant lots, acreage, farm and ranch improvements, commercial and industrial, and oil, gas, and other mineral reserves.

REFUNDING - A system by which a bond issue is redeemed by a new bond issue under conditions generally more favorable to the issuer (lower interest rate; fewer restrictions, etc.)

REPLACEMENT COSTS - The cost as of a certain date of a property which can render similar service (but which need not be of the same structural form) as the property to be replaced.

RESERVE, DEBT - A portion of fund balance equal to the average annual debt service requirement that has been reserved to provide assurance that resources are available to meet each fiscal year's debt service payment.

RESERVE, CAPITAL - A portion of fund balance equal to the average of the forecasted capital expenditures during the five year forecasted period has been reserved in each fiscal year budget to provide assurance that resources are available to provide for the normal replacement of depreciable assets.

RESERVE, (DEFICIT) - The amount by which fund balance does not meet all reserve requirements.

RESERVE, LEGAL - A portion of fund balance that may not be appropriated for expenditures or is legally segregated for a specific future use.

RESERVE, OPERATING - A portion of fund balance that has been reserved in each fiscal year budget to protect service delivery from unexpected revenue loss or expenditure requirement.

RESERVE, SURPLUS - A portion of fund balance that is not reserved for any specified purpose, and may be appropriated for one-time expenditures as needed.

REVENUE - Increases net total assets from other than expense refunds, capital contributions, and residual equity transfers. Funds received as income.

REVENUE BONDS - Legal debt instruments which finance public projects for such services as water or sewer. Revenues from the public project are pledged to pay principal and interest of the bonds.

ROW – Right of Way.

SLUDGE – Accumulated and concentrated solids generated within the wastewater treatment process that have not undergone a stabilization process.

SPECIAL ASSESSMENT FUNDS – An accounting fund type recommended by the Oklahoma Municipal Budget Act to account for the financing of public improvements or services deemed to benefit properties in a specified area, against which special assessments are levied.

SPECIAL REVENUE FUNDS – An accounting fund type recommended by the Oklahoma Municipal Budget Act to account for the proceeds of specific revenue sources and related expenditures separate and apart from other funds, but for which the specified revenues may be insufficient to meet the related expenditures.

STATEWIDE REVOLVING FUND (SRF) LOANS – Under the SRF program, municipalities can obtain up to 40 percent in matching funds for approved projects, when 60 percent of the construction costs can be obtained by the municipality on the open municipal bond market or from available funds of the municipality.

STP-UZA – Federal Surface Transportation Program (STP) funds sub allocated by formula to urbanized areas (UZA) with a population greater than 200,000. [Statutory Reference: Title 23, United States Code, 133(d)(3) and 133(f)] authorized under the Surface Transportation Act of 1990 as amended.

SUBSIDY – A gift or grant of public moneys to a private individual or corporation or to another governmental jurisdiction, or a gift or grant of moneys from one sub-entity to another within a governmental jurisdiction.

SURCHARGE - A condition in which the wastewater flow rate in a sewer system exceeds the capacity of the sewer lines to the extent that raw sewage begins to rise within manholes. A sewer surcharge is experienced in advance of a Backup and Overflow.

TARGET AREA - Area selected for further study under the sewer system evaluation survey (SSES).

TAXES - Compulsory charges levied by a government for the purpose of financing services performed for the common benefit.

TIP – Transportation Improvement Program is a three-year, prioritized listing of transportation needs in the TMA. The TIP is administered by ACOG, ODOT and FHWA.

TMA – Transportation Management Area is that area where ACOG plans for transportation needs.

TMDL – Total Maximum Daily Load is the amount of pollutants, from natural and man-made sources, which can be discharged to a specific body of water without causing harm to the water's quality or aquatic life. Any pollutant loading above the TMDL results in violation of applicable water quality standards.

WASTEWATER TREATMENT PLANT INVESTMENT FEE (WWTPIF) – A source of revenue for debt service and other capital and operational expenses of the Wastewater Treatment Plant improvements. The WWTPIF is the Norman Wastewater Utility's version of an impact fee that was authorized by Ordinance 9697-2 on July 23, 1996. The WWTPIF is a one-time charge paid at the time new homes or businesses are permitted for connection to the sewerage system.

WPA – Works Progress Administration.

WW – Wastewater.
