Subject: EXTERNAL EMAIL : Marijuana growing facility on 2505 W. Main St

I've seen flyers about stopping a marijuana growing facility. But knowing former employees of Mitsubishi I think a grow facility will be better then the shady car lot that occupies the space now. I think many of the issues raised in the flyer aren't true n are brought up to persuade people to vote with false pretenses. I know there people that dont like the idea but I believe they are being guided by ignorance and anti marijuana propaganda they've heard their whole life. I think some people see it as a bad thing and want to cast it in the most negative way possible, but I believe itll be a far better thing than they realize. Were finally on board with more then half the United states more and more research coming out showing the many lies told to demonize a plant that is so beneficial which can now be utilized and understood. People still want to hold us back and limit our potential based on anti marijuana propaganda and I think it hurts us as a people and as a community to not fully explore both sides of the issue. On a side note I'd much rather live in a community with a bunch of people who use marijuana then one with people taking and selling pills on every corner, and lying to doctors to get prescribed dangerous medications they then sell to people who dont understand what it is there taking and what it can do to there body. Great efforts are being made to stop our opioid problem im happy to see that and hope it continues, as I've personally seen many friend abuse opioids and the effects it has on there lives. Medical marijuana may not be for everybody but now we have good valid information along with people who care and wanna help, now each person can weigh the risk and rewards and decide for themselves if they wanna try medical marijuana. If someone can find relief without the often terrible side effects of other medication I believe it would hurt us as a society to stop them from exploring those options and forcing them to have to take possibly life altering substances that often doesnt actually fix the problem they only mask it. I believe the best way to handle medical marijuana is for people to have access to real information about medical marijuana. That way they can choose for themselves. Weither they choose to use it or not is not important it's that they have the choice to make the decision for themselves. I'm an omma patient and am not employed or affiliated with any medical marijuana operations.

Subject: EXTERNAL EMAIL : Proposed marijuana growing facility on W. Main

Saw a scare tactic flier going around asking for people to voice opposition to this manufacturing facility, but I would like to do the opposite and voice my approval for this growing facility on the basis that it would bring job opportunities to the area. As long as the operator or whoever is putting forth the proposal has a firm, detailed security infrastructure in place for the facility then I can't see the argument of rising crime having any basis in reality.

Subject: EXTERNAL EMAIL : Commercial marijuana grow

I am emailing about the commercial marijuana grow going in on Main St. I fully support this 100%. This will bring many, many jobs to the community and will help in the fight against the opioid and benzo crisis in our community. Thank you.

Hello, I am not a Norman resident, but my daughter lived there for 8 years. I love your city.

I wanted to voice my support of the medical cannabis industry. I understand that someone against the proposed growing facility at 2505 W. Main street. I hope your city council will do the right thing and allow this facility. The medical cannabis industry has already proven to be a positive thing for the state of Oklahoma. Please don't allow the bitter, negative attitude of one individual prevent job and economic growth for the city of Norman.

Thank you, Tonya Dees
Ardmore, OK

Subject: EXTERNAL EMAIL : Say Yes!!!

Please say yes to building the medical marijuana facility on Main street. If you research Colorado and California you would know that what the pamphlet that is circulating says is untrue. If anything this facility will bring IN jobs!!!!

The people voted for Medical Marijuana, the people who voted knew that facilities would have to be opened and operated. If you say NO to building the facility it goes against your majority voters.
